Address delivered by Hon. Chas. H. Simonton on the unveiling of the W. L. I. Monument, July 21st, 1891, in Washington Square.....	143
---	-----

Mayor Bryan's Annual Review.

CITY OF CHARLESTON,
EXECUTIVE DEPARTMENT,
January, 1892.

To the City Council of Charleston :

The Ordinances of the City require that the outgoing Mayor shall present to the City Council the reports of the various officers of the City for the current year.

It gives me pleasure to say that all of the Departments have maintained their high standard, being presided over by officers of long standing in the service, experience, ability and honesty. It is greatly to be desired that what has now become an unwritten law, to wit: the retention in office of capable public servants, will not be departed from in the future.

From the Treasurer's report it appears that all of our expenditures have been promptly met—the deficit of the previous year (1890) resulting from the opening of Concord street, has been made up, and there remains in the Treasury a surplus of ten thousand eight hundred and seventy-seven $\frac{86}{100}$ dollars, after all appropriations have been provided for.

The payment of the bonds which became due in October,

amounting to nineteen thousand two hundred dollars, has been provided for; the schedule printed herewith shows those of them which have been paid.

It cannot be amiss to put on record here my deep sense of gratitude to the members of the Ways and Means Committee (Messrs. J. Adger Smyth, C. S. Gadsden, James F. Redding, A. F. C. Cramer, Andrew Simonds and W. K. Darby), for their able and wise administration of the finances of the City during the past four years; their ever watchful care has made this part of my labors, as Mayor, an easy burden.

CITY ASSESSOR'S REPORT.

An examination of this report reveals the fact that the values of personal property for taxation have again decreased. The report is full of statistical information.

ASSESSOR'S OFFICE, CITY HALL,
Charleston, S. C., December 31st, 1891. }

To the Honorable the Mayor and City Council

of Charleston, S. C. :

GENTLEMEN: I have the honor to submit my Annual Report of this Department for the fiscal year ending December 31st, 1891.

The assessed value of Real and Personal Property returned for taxation is as follows:

Real Estate.....	\$14,878,430
Personal Property.....	6,554,601
Total.....	<u>\$21,433,031</u> — @ 22 Mills... <u>\$471,526 68</u>

As compared with assessments for year 1890, the following differences are shown :

Real Estate Increase.....	\$78,430
Personal Property Decrease.....	31,938
Total increase for 1891.....	<u>\$46,492</u>

The returns of Real Estate for the past four years, as compared with year 1887, shows an increase of \$657,140, while the returns of Personal Property for same period show a decrease of \$736,311, making a total decrease of the taxable basis for year 1891, as compared with year 1887, \$79,171.

The number of permits issued during the past year for the erection of new buildings, and old buildings improved, are as follows :

165 New Buildings.....	Reported Cost.....	\$402,850
114 Old Buildings Improved.....	Reported Cost.....	69,635
Total.....279 permits.....		Reported Cost\$472,485

A detailed statement, showing the number of permits issued in the different Wards, is attached to this Report, to which I refer.

The record of the sales of Real Estate kept during the past year continues to show an advance over assessments in all the wards of the city.

392 pieces, assessed for \$605,900, sold for \$880,218, an advance over assessments of 45.28 per cent.

I have prepared a statement, showing the comparison of assessments with sales in the different Wards, and the general average in the city, which is also appended to this Report.

In addition to the usual statements furnished with my Annual Reports, I have also prepared recapitulated statements for the period covering the past administration, 1888 to 1891, as a matter of comparison.

Accompanying this Report, I beg leave to hand the following annexed statements, which will furnish statistical information of interest to your honorable body and all corporators, to which I respectfully invite your attention.

WM. AIKEN KELLY,
City Assessor.

A.

CORPORATION COUNSEL.

The report of this officer shows a large amount of work accomplished during the year. The duties of this important office have been discharged with fidelity and zeal.

CORPORATION COUNSEL'S REPORT.

CHARLESTON, S. C., January 5th, 1892.

To the Honorable the Mayor and Aldermen of the City of Charleston.

GENTLEMEN—I respectfully submit my report as Corporation Counsel for the past year.

Judgments for past due taxes have been taken in forty-nine cases aggregating twenty-seven hundred and eighty $\frac{54}{100}$ Dollars (\$2,780.54) and executions thereunder have been issued to the City Sheriff.

Suits have been issued and judgments obtained in fifty-one cases for violations of the license ordinance, aggregating eighteen hundred and eighteen $\frac{25}{100}$ dollars. A large number of other cases for violations of the license ordinance, were instituted but were settled in the Sheriff's Office before being put into judgment. The case against J. C. H. Weller reported by me last year as being before the Supreme Court on defendant's appeal, has since been decided in favor of the city.

The appeals by the Ashley Phosphate Company in the cases against them, have been sustained by the Supreme Court. All the cases referred to me by your Honorable body "to enforce the law" were put in suit.

I have given nineteen written opinions upon questions submitted to me by the various departments of

the City Government and by the City Council and its Committees.

In August last one Edward Van Orden of the City of New York, brought an action in the United States Court for District of South Carolina against the City Council of Charleston claiming \$43,463, damages for an alleged infringement of his patent for improvement in feed water heaters for steam fire engines. I at once served a demand that the plaintiff should give security for costs. This was not done and subsequently the plaintiff abandoned the case.

At the request of the Mayor and Aldermen I prepared the following Memorial and Bill, for submission to the Legislature, which has since become a law :

1. Memorial to the Legislature for an Act authorizing the City Council to issue Coupon Bonds at a rate not exceeding Seven per cent. per annum, for the purpose of taking up or exchanging the Seven per cent. Coupon Bonds of the City, maturing in 1892, 1893, 1894, 1895, 1896 and 1897.
2. The Bill provided for in said Memorial.

At the request of the Mayor, I prepared the Memorial and other necessary papers, resolutions of City Council, memorandum on behalf of City Council with the United States, &c., in the matter of the continuation of Concord street through the Custom House grounds in the City of Charleston. These papers have been approved in Washington, and the street is now open.

At the request of the Mayor and Aldermen, I have prepared the following Ordinances which have become laws :

1. A Bill to strike out Sections 465, 466, 467, 468, 469, 470, 471 and 472, and to insert new Sections in their place.
2. A Bill to authorize the issue of Coupon Bonds at a rate not exceeding Five per cent. per annum, for the purpose of taking up or exchanging the seven per cent. Coupon Bonds of the City maturing in 1892, 1893, 1894, 1895, 1896 and 1897.
3. A Bill to abolish the Upper Market, situate at the N. E. Cor. of Vanderhorst and St. Philip streets,

Four titles were examined and two deeds to the City prepared for execution to wit:

1. Mrs. Fanny Alston for the extension of Rutledge street to Tradd street.
2. Mrs. Eliza B. Trenholm for the extension of Concord street.

I have filed answers setting up claim for City Taxes in several cases of foreclosure of mortgage which are now pending.

Respectfully submitted,

CHARLES INGLESBY,
Corporation Counsel.

THE STREET DEPARTMENT.

The report from this Department shows that the work of permanent improvements on our streets has steadily progressed, and at a reasonable cost. The intelligent conduct of the affairs of this department is well known to all, and requires no commendation at my hands. I cannot accept the recommendation for the abolition of what is known as the "shell road," as this is the only avenue in the city which is suitable for pleasure vehicles, and it should be kept in repair at least for the present. During the year two greatly needed extensions of streets were made, to wit: Rutledge Street from Broad Street to Tradd Street, and Lynch Street through to Calhoun Street. The East Shore Terminal Railroad has extended its tracks through Concord Street as far south as Exchange Street.

OFFICE OF SUPERINTENDENT OF STREETS, }
 Charleston, S. C., December 31st, 1891. }

To the Mayor and Aldermen of the City of Charleston :

GENTLEMEN : I beg leave to submit for your consideration my annual report for the year 1891 :

Meeting street stone roadway.....		3,073 05
Chapel street stone roadway.....		630 65
Friend street stone roadway.....		477 90
Total.....		<hr/> <hr/> \$96,916 08

STONE ROADWAYS.

The combination stone roadways in Meeting street, has been continued from Mary to Sheppard street, eighteen feet of block, and the sides of cobble, as in last year. Anson street, has been paved from Pinckney to Market, eighteen feet of block in the centre, and cobbles on the sides, Hayne Street was paved with block, from Anson west to include in front of the doorway of the Brewery. State street, from Market to Broad, has been paved with a combination of blocks and cobbles. Friend street, has been paved entirely with blocks, from Broad to Tradd.

The following are the measurements of each roadway:

Anson street, 650 yards granite blocks, 1,149 yards cobble; Hayne street 338 yards granite blocks; State street 3,160 yards granite block, 2,417 yards cobble; Friend street 1,546 yards granite blocks; Meeting street roadway, 4,712 yards granite blocks, 8,546 yards cobble.

The cost per square yard for each roadway is as follows:

Anson street.....	\$1 72
Hayne street.....	2 04
State street.....	2 07
Friend street.....	2 12
Meeting street Roadway.....	2 04

BLUE STONE FLAG PAVEMENTS.

The following sidewalks have been laid during the year:

Wall street.....	2,861 feet.	Reid street.....	2,796 feet.
Amherst street.....	2,285 "	America street	247 "
Spring street.....	5,243 "	Vanderhorst street..	11,591 "
Tradd street.....	4,809 "	Water street.....	2,854 "
George street.....	988 "	King street.....	866 "

BLUE STONE CURB.

Year by year the effort is being made to replace the old wooden curbs with Stone.

The following have been done this year :

South bay.....557 feet.	Vernon street..... 728 feet.
Concord street.....721 “	Marsh street..... 427 “
Inspection street.....795 “	Bogard street.....2,562 “
Chapel street.....502 “	America street..... 33 “
Tradd street.....496 “	King street..... 89 “
Laurens street129 “	Vanderhorst street..... 911 “
George street.....205 “	Water street..... 60 “
Crab street.....175 “	

BRICK PAVEMENTS.

The repairs to brick pavements has been continued wherever required.

The following is a list of the new work :

Broad street..320 yds. pavement.	Tradd street.....277 yds. pavement.
King street...222 “	Lightwood alley..123 “
Water street. 82 “	Logan street..... 77
Legare street 67 “	

The following brick drains were cleaned during the year :

Water street, Church street and King street.

Temporary repairs and cleaning has been done in many other drains.

PIPE DRAINS.

The system of pipe drains has been continued with satisfaction ; in fact, I think it is the only proper system for this city. The following is what has been done during the year :

Percy street.....450 feet	12 inch	
Percy street..... 56 “	8 “	laterals
Payne street.....614 “	18 “	
Payne street..... 54 “	12 “	laterals
Payne street..... 38 “	8 “	laterals
Sires alley.....500 “	12 “	
Shepherd street.....300 “	8 “	
Drake street.....100 “	12 “	
Reid street.....100 “	8 “	

PLANK ROADS.

The usual expensive repairs have been necessary, but with the definite system of permanent work which has

been adopted, I trust, in a few years, this expensive and unsatisfactory work will be unnecessary.

WOODEN CURBS AND CROSSINGS.

This class of work, which for the present is necessary, I hope will be steadily curtailed with the stone which is yearly bought for this purpose.

MEETING STREET SHELL ROAD.

This road is in good condition, but I regret to say that the cost of maintenance is increasing every year. The road-bed seems to have been worn away, and the winds have blown the fine shell off from the roadway, so as to leave but a thin covering of shell. At present this roadway costs more for repairs than I think is warranted, and I submit for your serious consideration the proposition of substituting another class of roadway, which may cost more in the beginning, but will be cheaper in the end. I do not see how this road can be abandoned, as it is the principal drive out of the city to the cemeteries and other places of interest. Twenty-seven thousand three hundred and eighty-eight bushels of shell were used on the road during the year.

SCAVENGER DIVISION.

This division of this department has been efficiently managed by the officers who had it in charge. The number of loads of garbage hauled during the year, 32,681. In addition to the scavenger work proper, large amounts of sand, gravel, shell, stone and bricks have been hauled without extra cost to the city.

Very respectfully,

T. A. HUGUENIN,

Superintendent Streets.

REPORT OF HEALTH OFFICER.

The same watchful care which has characterized the Health Department in the past still continues, and has been productive of the best results. Among the most important duties assigned to its keeping is the care of the sick poor of the city. Under the existing Ordinances ample provision is made for this class of our community, and the restriction preventing the Health Physicians from taking private practice for pay, greatly enhances the value of the public service in this respect. The poor have had better attention, and there have been fewer complaints. The recommendations made by this Department as to inspection of food and plumbing, and the improvement of the sewerage system, require the most serious consideration at your hands.

REPORT OF HEALTH OFFICER FOR THE YEAR 1891.

CITY OF CHARLESTON, SO. CA., }
DEPARTMENT OF HEALTH, January, 1892. }

To the Hon. the Mayor and Aldermen :

GENTLEMEN:—I have the honor to submit my annual report, conveying the tables of vital statistics and meteorological observations, with such procedures of this Department as have been undertaken for the benefit of this Department, and the general health of the city, for the year 1891.

There has been no epidemic in the city during the past year, except a visitation of La Grippe, which also visited the entire country—15 white and 21 colored deaths occurred. The Epidemic was most general. A few deaths have occurred from diphtheria—whites 2, colored 1. Total 3. No scarlet fever deaths, and very few deaths from typhoid

fever; in fact, there have been fewer deaths from typhoid fever in 1891 than for twenty years past. This is most encouraging, and might be well regarded as a good test of cleanliness and good water.

There were 234 deaths from diarrrhœal diseases. This is far above the average, and is a very large number, it is most suggestive of a great necessity for some protection against improper and impure food.

Consumption claims 41 white and 203 colored victims. Total 244—one death in every eight deaths from this disease.

QUARANTINE.

The Quarantine Station of Charleston Harbor at Fort Johnson continues to give the greatest satisfaction.

It is furnished with all modern scientific appliances, and while all restrictions to commerce are recognized as irksome, the detention has been reduced to a minimum number of days.

The Holt System, embracing—Steam heating—at 230 degrees, Bi-chloride of mercury spray, and sulphur fumigation 18 per cent., furnishes a complete system of disinfection.

Communication with the post is maintained with a naphtha launch, which has given the most complete satisfaction.

The two wharves have been found to be most convenient—one furnishing disinfection and the other giving full opportunity for the discharge of ballast.

No diseases of a contagious or infectious type have appeared at the station during the past year. Dr. Lebby, Quarantine Officer, has been constantly on duty during the year, and continues to bestow his energy, zeal and thorough proficiency.

There were 230 arrivals at Quarantine during 1891.

Steamships	100	Brigs	18

South America.....	7	Spain	6
Teneriffe.....	1	West Indies.....	53
		Total	230

SANITARY INSPECTORS.

The city is divided into 4 Sanitary Districts—to each of these is assigned a Sanitary Inspector. It is the duty of these Inspectors to superintend the carrying off of the garbage in the earlier hours of the day, and later to visit fifty premises, and to report as to the condition of these premises and where the necessity occurs to have the privies and drains cleansed. Many thousand notices to owners indicate a vast amount of work. These officers have been faithful, and the service is most efficiently done.

In this connection it is most important that the recommendations of the Board of Health to City Council should be carried out, viz: that there should be provision made for

Inspection of food.

Inspection of plumbing.

There can be no gainsaying the statement that an immense amount of unsound food is sold in Charleston every year.

Every year the amount of plumbing work is multiplying and it is most necessary that this work should be done according to requirements, such as the Board of Health deem proper for the public health.

DISINFECTION.

This very important work is most satisfactorily done under the immediate attention of Mr. F. Nipson. We feel assured that our great immunity from infectious and contagious disease is greatly due to the very rigid custom of

furnishing a full supply of disinfectants to every house which is reported as having a case of contagious or infectious disease—at the termination of every case the health detective, Mr. Nipson, fumigates most thoroughly with sulphur dioxide gas.

There was not a death from scarlet fever last year, and but three deaths from diphtheria—at once, as a case is reported the greatest care is taken to instruct the dwellers on the premises as to the importance of protection—circulars are furnished as well as the disinfectants. During the summer months deodorizing solutions are placed in all public places which require it, and a supply of disinfectants is furnished to any and all who ask for it.

62 houses were fumigated and disinfected.

6,892 persons were supplied with chloride of lime and 38,700 gallons of copperas solution were distributed.

3 horses and 2 mules, suffering from glanders, were killed.

INTERMENTS.

Interments were made within the city limits during the year 1891 at the following burial grounds :

SCAVENGERING.

The removal of garbage from the city is entirely under the control of the city authorities. The carts are owned by the city, and a superintendent is directly charged with the duty of overlooking them. The result is, that at a minimum cost the garbage is removed, and removed at an early hour.

For the last ten or twelve years this procedure has been in operation, and has worked most successfully. Not only is the garbage removed at an early hour, but an immense deal of work is done for the city—the carts being employed after the removal of garbage, in doing city work—nearly all the city hauling for the paving of the streets has been done in this way. The city has in this method complete control, and can concentrate without any additional cost. The garbage is hauled out of the city to outlying salt marsh lands and serves a most useful purpose in making a foundation for roadways through the salt marsh. The number of loads removed during the year was 32,681.

NIGHT SOIL.

During the past year there were 2,152 vaults cleaned out. The best that is possible is done in reference to this very great nuisance. The vaults continue to be the greatest nuisance in the city, and have been so for many a long year. Were it not that our soil is more or less percolated to a great extent with salt water, it would be a probable source of serious unhealthiness. They are certainly very offensive. During the long summer months these receptacles and storage vaults for material that is constantly undergoing decomposition and emitting pestiferous odors continue to suggest a most important departure, and that is the removal of the excreta of the city by water conduit. It is to be hoped that, at an early day, with the success of a new artesian well that is about being dug, that a sufficient supply of water will be afforded to make a beginning, and at least undertake the lower section of the city. It occurs to us that the city could be divided into four sections, and commence sewerage first as far as Broad street, then up to Calhoun street, then to Spring street, then beyond.

CITY DISPENSARY SERVICE.

The city dispensary physicians report during the past year, 1891, 25,829 cases treated in the four Health Districts. This is a monumental charity. As will be seen, thousands of our poor have skilled medical attention, and drugs furnished; and that effected at a very small amount, when the immense work is recognized.

I am glad to be the means of testifying to the great loyalty of these medical officers. It is a most harrassing service, and it is well performed. Whites and blacks receive equally the attention required on demand. There were 20,029 blacks and 5,800 whites attended.

During the year there were 19,269 prescriptions dispensed free of charge.

ANNUAL SUMMARY OF METEOROLOGICAL OBSERVATIONS MADE BY THE WEATHER BUREAU, CHARLESTON, S. C., 1891.

AIR PRESSURE.

Mean, reduced to 32° Fahrenheit and sea-level, 30.10 inches.

Highest, reduced to 32° Fahrenheit and sea-level, 30.70 inches, November 19.

Lowest, reduced to 32° Fahrenheit and sea-level, 29.55 inches, February 26.

Annual range in pressure, 1.15 inches.

AIR TEMPERATURE.

Mean, 66.5 degrees.

The average annual temperature of Charleston, for 20 years, is 66.0 degrees and for the months—January, 49.9; February, 53.7; March, 56.7; April, 64.2; May, 72.7; June, 78.8; July, 82.3; August, 79.8; September, 75.4; October, 67.7; November, 58.9; December, 51.9.

Highest, 95, July 4.

Lowest, 29, February 27 and December 1.

Annual range, 66.

Greatest daily range, 28, March 6.

Least daily range, 3, October 11.

Greatest monthly range, 51, in February.

Least monthly range, 25, in September.

Mean monthly range, 39.

Mean daily range, 14.

Number of days on which temperatures were above 90 : 21 days; in May, 1 day; June, 5; July, 4; August, 11.

Number of days on which temperatures were below 32 : 3 days; in February, 1 day; November, 1 day, and December, 1 day.

Last Ice formed March 15.

First Ice formed November 30.

HUMIDITY.

Mean dew-point, 59 degrees.

Mean Relative humidity of the air, 84%.

WEATHER.

Mean cloudiness, (scale 0 to 10 tenths,) 5.1 tenths.

Greatest monthly cloudiness, 7.0 tenths, in March.

Least monthly cloudiness 3.1 tenths, in April.

There were 120 cloudless days, distributed as follows:—

January, 13; February, 3; March, 5; April, 19; May, 11; June, 8; July, 6; August, 11; September, 11; October, 14; November, 12; December, 7.

There were 140 partly cloudy days, distributed as follows:—January, 9; February, 12; March, 6; April, 10; May, 12; June, 13; July, 9; August, 19; September, 14; October, 9; November, 12; December, 15.

There were 105 cloudy days, distributed as follows:—January, 9; February, 13; March, 20; April, 1; May, 8; June, 9; July, 16; August, 1; September, 5; October, 8; November, 6; December, 9.

WIND.

Prevailing direction :—Northeast.

Total movement, 62,401 miles.

Greatest monthly movement, 6,910, in February.

Least monthly movement, 3,205, in August.

Greatest daily movement, 437, December 18.

Least daily movement, 15, August 15.

Highest velocity, 36 miles, N. W., November 18.

Number of times the wind was observed blowing from the N., 91 times; N. E., 150; E., 78; S. E., 49; S., 32; S. W., 141; W., 69; N. W., 60; number of calms, 120.

The average hourly wind velocity for the year is 7.1 miles. The hourly values are:—1 a. m., 5.6 miles; 2 a. m., 5.6; 3 a. m., 5.5; 4 a. m., 5.4; 5 a. m., 5.6; 6 a. m., 5.7; 7 a. m., 5.9; 8 a. m., 6.5; 9 a. m., 7.2; 10 a. m., 7.6; 11 a. m., 8.0; 12 noon, 8.6; 1 p. m., 9.3; 2 p. m., 9.9; 3 p. m., 10.2; 4 p. m., 10.0; 5 p. m., 9.7; 6 p. m., 8.5; 7 p. m., 7.4; 8 p.

m., 6.4 ; 9 p. m., 5.9 ; 10 p. m., 5.6 ; 11 p. m., 5.7 ; 12 mid-night, 5.6.

PRECIPITATION.

Total, 45.50 inches.

Greatest monthly, 8.98 ins., in July.

Least monthly, 0.99 inch, in February.

Greatest in any 24 consecutive hours, 3.81 inches, July 19 and 20.

The average annual precipitation of Charleston for 20 years, is 56.98 inches, and for the months—January, 4.07 inches ; February, 3.46 ; March, 4.01 ; April, 4.06 ; May, 4.06 ; June, 5.28 ; July, 7.40 ; August, 7.31 ; September, 6.09 ; October, 4.36 ; November, 3.26 ; December, 3.62.

There were 129 days on which 0.01 inch or more of precipitation occurred.

Thunder-storms occurred as follows:—in February, 1 ; March, 1 ; May, 1 ; June, 5 ; July, 3 ; August, 2 ; September, 2 ; November, 1 ; December, 1.

The last frost occurred April 6.

The first frost occurred October 21.

L. N. JESUNOFSKY,

Observer, Weather Bureau.

Charleston, S. C., January 5, 1892.

DEPARTMENT OF HEALTH.

CHARLESTON, S. C., December 2d, 1891.REPORT OF DR. H. B. HORLBECK, 19TH MEETING OF THE
AMERICAN PUBLIC HEALTH ASSOCIATION HELD IN KANSAS
CITY, OCTOBER 20-23, 1891.

The badges presented by the local committee of arrangements to the members of the A. P. H. A. at Kansas City indicated the comprehensive character of the meeting. In the centre of each of these badges are grouped three flags—Mexican, Canadian and the Stars and Stripes.

This will give an idea of the present membership of the Association—about 150 members of the United States, 13 from Mexico and several from Canada.

These men were brought together to meet each other for the nineteenth time, to confer together as to the best means of lengthening human life, abrogating disease, and diminishing human suffering.

They met at ten o'clock on time in the auditorium.

Doctor Montizambert, of Canada, the President, declared the Association convened; after the initiatory business, the Association commenced work.

Dr. McDonald, of Kansas City, read the first paper: on infant mortality. He said that infant mortality soon after birth was 20 per cent. and where the infant, is fed by artificial means, it reached 50 per cent., with natural food, the mortality was but 10 per cent.; in reference to artificial foods, he said that he was opposed to all of them outside of the milk they contain; there was no good in any of them. One of the principal causes of mortality was exposure to a low temperature—a chilly room soon after birth, forcing sleep by soothing syrups was also another evil.

The best artificial food was milk, pure cow's milk; no starchy substance could be digested in the infant stomach.

Starchy infant food is converted by the chemical processes of the stomach first into sugar, then alcohol and then acetic acid, when nature gets ready for starchy food, she gives teeth. No sensible farmer would attempt to feed a calf on hay.

Dr. Sharp read the next paper ; on glanders in man. He classed glanders with acute infectious diseases, such as tuberculosis. This terrible disease is readily transmitted to man and he gave a report of a case which had occurred in his practice ; he recommended that for the prevention of glanders in persons coming in contact with the disease or horses having open sores or discharges from the nose, they should disinfect the hand with a solution containing a tablespoonful of equal parts of carbolic acid and glycerine in a quart of hot water ; or, ten grains of corrosive sublimate in a quart of water.

Dr. Paquin told of seventeen cases of glanders in man that he knew of as occurring in the State, as an instance of the virulence of the poison, he told of a case occurring from a horse to a man driving behind. He was struck in the eye by a spray from the beast's nostril, glanders developing rapidly and ending in the man's death.

A very excellent paper was then read by Chief Justice Horton, of Kansas, on the necessity of more stringent legislation to repress empiricism : he said that upon health the happiness and prosperity of the world depended. All assistance or promotion along this line was among the highest of missions and the noblest of all aspirations. Empiricism is one of the worst obstacles in the path of the progress of medicine, it is of old origin and has been traced back to ancient Greece. A few learned men then belonged to the empirical school or school of practical observation, but most of the empirics were unlearned. The word means now only an ignorant quack.

He is full of coarse wit and low buffoonery. He is totally ignorant of medicine—medicine is medicine, he says to himself, and one doctor is as good as another. He gets to the corner of a public square, calls for a deaf man, pours a

few drops in his ear and then calls out in a loud voice that the man is cured. The man is probably an accomplice. There are a number of varieties in empirics. In another specimen of quack, there is more tact and dignity. He has more education. He secures testimonials from prominent people. Mixes his own vile compounds, charges large fees, injures the public health, the medical profession and the finances of the community, and departs unscathed. By law the legislatures have the power to regulate empiricism. The Legislature may prescribe the qualifications of those who practice whether they have sufficient learning and skill. Attempts have been made by the Legislature of Kansas and other States to suppress empiricism, but so far but little good has been done.

He spoke eloquently of the legitimate practitioner of medicine. He was the wise counsellor, the skilled restorer, the sympathetic friend.

To protect the public the A. P. H. A. should recommend the enactment of Statutes excluding from the medical profession those who are not competent, by learning, skill and experience to practice, and punishment by imprisonment, for any who violate the provisions. No one should be permitted to practice medicine or engage in surgery unless authorized to do so by a competent Board of government or State examiners.

Mr. Allen Hazen, of Mass., then read a paper on water supply and public health. He said, typhoid fever and cholera bacteria are taken into the system through food and drink. Pure water is, therefore, a necessity. If water is absolutely free from sewage it can be depended upon as comparatively pure, although many waters not polluted by sewage have been known to breed disease. Flowing streams will partially free themselves. Reservoirs and long channels where water flows and becomes aerated, will not always purify it. Some system of filtration is therefore imperative, and the question to be decided, is the best means of filtration, and all present systems are, more or less defective.

Doctor Horlbeck then presented some facts in relation to

the comparative death rate among the white and black race. He indicated that in a number of cases the death rate was double among blacks to that among the whites. He offered resolutions shewing the importance of having a separate list published as to the whites and as to the blacks, and said that the U. S. Marine Hospital service only published the total in American cities. This did not fully give the ratio as to the two races. The resolutions were adopted requesting the marine service to publish separate lists. Black and white races.

It is the custom of the A. P. H. A. to have the first evening set apart to hear the annual address of the President. On this occasion there were speeches of welcome from the governors of Missouri and from the State of Kansas, also from Hon. John L. Peake, of Kansas City. The auditorium building was filled by a large and attentive audience. A grand band of music was stationed in the orchestra seats and discoursed beautiful music. The scene was a handsome one, the stage was filled with the officers and the Mexican contingent.

Governor Francis gave a most eloquent welcome to the Association; he said among other things that the age was intensely practical, but is constantly growing less selfish. A broader humanity is daily taking root in the hearts of man. Church and State and Society, enlightened, progressive, philanthropic, and practical, are all working to a common end—the elevation of man.

You who have assembled for the purpose of giving to each other and to the world, the results of your labor and research for better sanitation, and the prevention of disease, are leaders in the great contest and the State and humanity acknowledge obligation to you for scientific applications and discoveries.

In addition to its moral grandeur this sanitary work has a material value almost incomprehensible and certainly incalculable. If labor is the basis of all value, every human life must possess its proportionate worth. The city or the State which adopts and enforces with firmness and im-

partiality, the strictest sanitary regulations, not only enhances its material interests, but adds a charm to the attractions of home, and inspires its children with a more devoted patriotism. Missouri recognizes in you representatives of the most advanced thought of the times and the highest type of citizenship and salutes you as public benefactors.

Dr. Montizambert then delivered his annual address, he said; The objects of this Association shall be the advancement of sanitary science, and the promotion of organizations and measures for the practical application of public hygiene; this is the definition of our constitution. An acknowledged interest in, or devotion to sanitary studies and allied sciences, and to the practical application of the same. That is the qualification for admission and that alone; it is not confined to the medical profession. Any one is welcome to our ranks who takes an interest in the grand objects of the prevention of disease, and the raising of the standard of the people's health. Last year we met in a sea coast city, and quarantine—the prevention of disease from without getting into the country—came prominently under consideration. This year we meet in an inland city and health organizations to prevent disease and to deal with disease, that had got in, seem naturally to invite the greater attention. There are two main strings to a sanitary bow—a system of maritime sanitation at the ports of entry, and a system of prevention and preparedness in the interior communities. Neither is sufficient without the other. Coast quarantine and inland health organizations form our double line of defense. As to the necessity for a common fight against disease, quoting Spencer Wells, he said; “Instruct your mayor and corporation, your clergy, and household, that cases of typhoid fever, diphtheria, small pox, measles or whooping cough, can no longer be looked on as natural providential or unavoidable, but that their existence is a proof of ignorance and negligence, and a disgrace to the country, to the town, and to the family. Sunlight, pure air, and cleanliness, are natural enemies of disease germs. These

cannot live where they have not their natural food, which is found in dampness, darkness, mould and dirt."

The experiments of Koch, Ransome and others, prove that the living germs of consumption, when exposed to the sunlight, lose their vitality, in a few hours, or even in a few minutes, if the layer in which they are exposed be thin enough, and that even ordinary daylight, if it last long enough, will have a similar effect.

On Wednesday morning the Association were carried out to the slaughter houses, which form so large a part of the prosperity and industry of Kansas City. I was among the twenty-five who went through the Armour packing house. It is most certainly an interesting sight to note the method of disposing of the carcasses of 1,500 cattle and 3,000 hogs; as they said there was no waste, and nothing escapes them but the squeak of the hog when his throat is stuck with a keen thrust knife. All this killing is under careful inspection, and no meat is used that is even suspicious.

There is an inspection by the United States authorities specially for trichina—in the hog—for export. There is a Vet. Surgeon, E. L. Dundas, in charge of the work. A piece of the hog is taken from the diaphragm and also from some other portion of the hog. These pieces are put in a tin box, joined together by a wire and with a number corresponding to the number upon the carcass, the same pieces kept in the cooling room. These tin boxes are carried to the Laboratory, which is several squares from the slaughter house. Here there is a well lighted microscopical room, and twenty-two young women are seated at tables, each with a microscope, busily engaged in a hunt for the trichina. When they are discovered the fact is recorded upon a card, and this, with the tin box, are given to the superintendent of the Laboratory, who re-examines the same and confirms the report or not. If confirmed, the carcass corresponding to the tag in tin box is condemned, and the same is taken from the cooling room and carried to the fertilizer tanks: 3 or 4 per cent, of the hogs exam-

ined have the trichina, as the examination can only be had with a very small percentage, and this for export, it would seem a happy thing that these trichina are killed in cooking, otherwise man would be victimized to a dreadful degree.

The whole establishment is a gigantic model of management to subserve the ends for which it is used. A large part of the meat is cooked and put in tins ready for immediate use. A bellowing steer and a squealing hog are run into the abattois, and they come out in very pretty commercial (decorated tin) packages ready to be sent over the world.

The Association convened at 11.30. The first paper read was by Dr. P. Paquin. Subject: Vaccine and Vaccination. He spoke of the necessity for absolutely pure virus. He said that virus should not contain any foreign substance whatever. He graded virus as absolutely pure, fairly pure, comparatively pure, impure, septic and dangerous. He claimed that all the trouble arising came from impure virus. In the discussion that followed, it was deemed proper that all virus sold by the manufacturers should be registered, and a copy kept carefully of the record. The general consensus of opinion was in favor of bovine virus. Dr. Ycaza, of Mexico, said that it had been found best in Mexico to use humanized virus. The whole question of the collection and culture of the virus was under the absolute care and control of the Government. There are doctors whose whole time is devoted to this matter of vaccination. All children are required to present themselves at stated periods for vaccination. The healthiest subjects are alone taken for the culture of the virus, and the result has been to drive small-pox epidemics from the land. He thought that everything depended on the intelligent handling of the virus by the physician using it, and is satisfied that its proper handling need cause no trouble to the patients or any friends.

Dr. Paquin in his paper said that he had found specimens, among others, of the following Bacilli: *Bacillus Pyogenes Foetidus*, *Stahylococcus Pyogenesis Aureus*, *Bacillus Septicus* and a *Gangrene Micrococcus*.

Dr. Gayol, engineer of the City of Mexico then read a most interesting paper on the recent drainage works of that city. The city of Mexico, he said was situated at the bottom of the valley of the same name, inclosed by mountains, which are of great altitude on the eastern western and southern sides. On the north there is a depression, this rises about 250 feet above the city.

This valley contains 3 natural and 3 artificial lakes. Lake Texcoco natural lake, is the lowest and the most extensive; and receives the refuse of the city. Its waters are strongly impregnated with salts, chiefly carbonate of soda, and these keep the waters healthy, though for several centuries the lake has received the refuse of hundreds of thousand of people. The bottom of the lake has risen by these accretions, until now its bottom is but 6 feet below the mean city level. This difference of level was the only means of giving current to the city's sewage and its decrease often causes a general inundation. To guard against this trouble a system has been devised. This project includes a tunnel six miles long and a canal thirty miles long. It will take care of the sewage of the city. 8,000,000 cubic feet of dirt are being removed monthly from the canal and the tunnel is being pushed through at the rate of 600 feet a month. It is expected that the work will be finished in 3 years, and it will result in the drainage of lake Texcoco. The sewers are arranged to be flushed every day by water from two of the lakes, to the full capacity of the pipes which will be 66,000 feet for drainage a minute with a velocity of two feet a second. This rate of speed being essential to carry off the solids which would accumulate.

Professor Delos Fall, Chairman of the Committee on the disposal of Garbage than read a valuable report. He spoke of the intimate relation of typhoid fever, and the accumulation of waste of organic matter. He described the various methods used, and said that in New York the method is to take the garbage out to sea and dump it; Philadelphia recommended cremation. Chicago objected to using the garbage for filling waste places and then building on it. San

Francisco recommended cremation. Baltimore has dumps which are objectionable. St. Louis gives its garbage to a desicating company, which is under contract to remove the same. In Charleston the city moves its own waste out early during the day, and dumps it on to a salt water marsh. Milwaukie has been using the Mertz system, but now dumps it into the lake. The methods in use are dumping away from human habitations, cremating it, and desicating it.

Dr. Clark recommended a galvanized iron tank holding about two or three bushels as the best receptacle for holding garbage. The tank must not be placed on the street or sidewalk but the collector should be made to go in, and get it, remove the contents and replace the cover. The appearance of many beautiful streets was destroyed by those unsightly boxes and barrels. For transporting garbage dumping carts were best for short hauls, and wagons for long hauls. The beds of these carts should be made water tight and made of iron. They should be flushed after each load and the driver who neglected this most important sanitary proceeding should be punished, or better, discharged. Dr. Clark preferred the Mertz system to all others. This consists in disposing of the garbage in a furnace. It renders the organic matter into a fertilizer, and extracts the oil and the refuse is dumped for filling.

At the evening's session Dr. Kinyoun read a paper on Rabies. He said that this terrible disease was almost entirely transmitted by the Canine and Feline species. This disease prevails over the entire globe except in Australia, where the disease is unknown. He regretted that so little is known of this disease, and so little report is made of the disease. He said that the best sources of information were the public press. He opposed the idea that the disease was more common in summer, or confined to warm weather. The statistics showed the greater number of deaths as occurring in May and December. The disease rarely appears later than six months after inoculation. He spoke of the Pasteur institutes and of their great success, the percentage being very small where the proper application of the system was had.

He said that the Saliva became virulent several days before any symptoms appeared. Recognition is not easy in the early stages in the animal. He advocated strict Quarantine regulations in order to eradicate the disease, especially the prolonged and universal wearing of the muzzle by all dogs throughout the country.

On Thursday morning the Advisory Council held a meeting for the election of officers, and also to decide the place of the next meeting. It soon became evident that the Association thought it proper to accept the invitation tendered by President Diaz to meet in Mexico City. This being the case it was a matter of great consequence that some officer should be chosen who could speak the Spanish language. Dr. F. Formento who is a gifted linguist, was unanimously chosen, and Mexico City was chosen for the place of meeting next time.

On assembling at the morning session Dr. Bryce, of Toronto, read a paper on *The present position of the milk supply problem, from the Public Health standpoint, and some practical methods for securing safe public supplies*. He stated that there were about 15,000.000 milk cows in the United States and about 1,000.000 in Canada. Each one of these gives about 100 gallons of milk annually. He said that experiments had demonstrated that tuberculous cows could transmit tuberculosis to the human subject through the milk secretion. Statistics were shown giving a large proportion of cows infected with tuberculosis or consumption. Cows with infected tissues cannot furnish normal milk.

How to get pure milk ?

1. It is especially desirable, that a system of periodic veterinary inspection be exercised in addition to the dairyman's inspection.

2. Strong views should be held and exercised regarding the nature and quality of food of cows. All decomposed foods as those which are liable to undergo fermentation, should be wholly avoided. The best foods are well ripened grains and grasses.

3. The stables of the cows are a point of great importance.

Too often dark, damp, ill-ventilated and crowded pens have been the home of this chief of our food supplies. It is quite possible to keep even on a large scale, a dairy stable free from the ordinary disagreeable stable odors. The water supply to the cows is of equal importance.

4. The care of the milk at the time of taking and subsequently is of all points at once the most difficult and the most necessary to supplying a wholesome milk. As De-Claux has said "cleanliness is everywhere the *sine qua non*." This means almost a revolution amongst farmers and dairymen. The sterilizing of all cans and bottles by steam or dry heat, and the boiling of all strainers will be necessary.

5. The delivery of the milk is of prime importance.

6. When milk has reached the consumer it must be placed in a refrigerator or promptly consumed.

Dr. Snow, Chancellor of the Kansas University, delivered a most interesting address on the Chinch Bug. This is a most terrible burden to Western farmers. He said that Chinch Bugs did \$100,000,000 of harm every year in the United States.

After this statement Dr. Snow certainly kept the full attention of the Association. He said that for the past three years he had been engaged in trying to diminish these ravages. It had been noticed that these bugs suffered from certain diseases, notably a fungus. It was proven that *Sporotrichum-Globuliferum* and *Empusa-Aphudis* are capable of producing fatal results among the bugs, and also of rapidly spreading the disease. These are *Fungi*, the former white and the latter grey. He described the method of spreading the disease. A few diseased bugs were captured. They were put in a large glass whose bottom was covered with damp sand. They were well supplied with green wheat. As many healthy bugs as could be captured were put in the jar. In thirteen days nearly every bug was dead. They had all caught *Sporotrichum-Globuliferum*. As demands came in for these bugs and three thousand demands had been made, a half-dozen dead bugs were put in a pill box, and the farmers were instructed to put two or three hun-

dred bugs into the jar with the infected bugs. Within twenty-four hours every bug would catch the disease. They were all to be turned loose into the wheat fields. Within twelve days the field would be filled with the dead bugs. In about ninety per cent. the disease had been found highly effective. As long as there were any sick bugs the disease went on. In one case 10,000 died in nine days from the infection caught from one dozen dead ones.

During the afternoon an excursion was had out into the farming country of the State of Kansas. This trip gave the members an opportunity to see the splendid resources of this section of the United States.

Great herds of the finest cattle were seen on great pastures, and the country was evidently very rich in agricultural products.

Dr. Daniels, Chairman of the Committee on Car sanitation read a very interesting report. He said that there was great room for improvement and suggested a more liberal use of rattan fittings for the cars instead of tapestry. He censured the railroad companies for not more properly caring for the public, as they allow the cars to remain often in a very unsanitary condition. Passenger cars should be thoroughly cleaned and renovated both before and after each trip. Especially should this be done where cars take long trips carrying emigrants. He also censured the present method of heating which made no provision for ventilation. There were very few cars properly ventilated. He quoted from a report made by Dr. Horlbeck noting the great success of the Emerson method. By this method a car can be thoroughly ventilated as well as heated. Dr. Reid expressed the opinion that the whole matter was with the people, the trouble was that the people did not demand these things. If they demanded proper ventilation they would get it.

Dr. Horlbeck then explained the progress made by the Emerson Car Company. He said that an entirely new car had been made with all of the appliances of the company. He had taken an experimental trip, and the air was contin-

uously changed. Not only was fresh air constantly put in the car but at the same time the air which had become foul was removed from the car. He said however, that none of the railroad companies seemed disposed to furnish fresh air to their passengers. It seemed that if the passengers could have a stove in the winter and an open window and ice water in the summer all was well. He spoke of the long trip from Charleston and two nights spent on the cars and each morning a severe headache. It was to be expected. Breathing the expired air all night could not produce any other result. The only possible way seemed to be to educate the traveling public to demanding these things.

Dr. Dundas, U. S. Vet. Inspector at Kansay City packing houses, read a paper on Animal Diseases. He spoke strongly against diseased cattle being shipped to market. As soon as a farmer finds his herd affected with tuberculosis, he immediately ships them off to market. He recommends constant inspection. He also recommended the police supervision of all milk dairies. He laid to the Jersey cow the blame of being most generally afflicted with tuberculosis. Dr. Bryce spoke of tuberculosis in milk, and said that this was the way that tuberculosis was transmitted, viz: through milk. Such being the case, he said that in Canada we never breed our milk cows, and in one city of great importance we never use a milch cow after she once goes dry. She is immediately sent to the butcher. It seems to me that in view of the startling fact that there are 15,000,000 milch cows, and that there are from 5 to 10 per cent. affected with tuberculosis, that there should be a most careful and rigid inspection of all milk cows, as is due to the public.

Dr. Orevananos gave a very interesting report of the new organization of the Supreme Board of Health of Mexico. The system shows a most complete system of supervision. It was a grand and sweeping system, and showed that the government of the Republic of Mexico were well in advance of the United States in these respects—inland and quarantine. This is of very recent origin. President Dias is deeply in-

terested in sanitary matters, and will see that every endeavor is made to carry out the best sanitary precautions.

During the evening the Association was entertained by the Commercial Club of Kansas City. Speeches of welcome and congratulation were made.

Friday saw the end of the 19th annual meeting of the Association. Two important resolutions were passed. It was resolved as the sense of the Association that State and provincial inspection of the production of vaccine virus be established.

The other was a resolution asking the general government to establish a Federal Department of Health, to have at its head a Secretary who shall be a Cabinet officer.

The Association passed the following resolution :

Resolved, That this Association will hold its meeting in 1893 in the city of Chicago, and that so far as possible the occasion be made an International Congress of Hygiene and Public Health.

Dr. Hewitt then read a paper on "The existing methods of dealing with Emigrants as respects Infectious Diseases in England, and on English ships." He spoke of the insufficient regulations of England, which were antiquated and bungling. He read a case of an English ship going to England and having had a case of small pox, and having passed an hour and a half at quarantine, and receiving a few ounces of sulphur fumes, and being given Pratique, small pox having broken out on the new voyage; and all of this should never have happened.

The Association listened to several other papers, one an interesting one from Dr. Bell, editor of the Sanitarian, on the new baths. Free and public baths have been established in New York.

By this method large numbers can be washed at the same time, 40 or 50, and all done in a very short time, occupying but a few minutes. Pipes run along a ceiling, and the pressure is put on overhead. The bathers stand in a nude state below, the water is made of any warmth required,

DEATH FROM CERTAIN ZYMOTIC DISEASES IN TWENTY-FIVE YEARS—FROM 1865 TO 1889 INCLUSIVE.

[illegible]

depending on the season. It is a very great boon to the people of New York.

The Association were the recipients of many hospitalities at the hands of the people of Kansas City; and to Dr. Lewis, the chairman of the local committee, are due the thanks of the body. Kansas City, situated in the centre of a vast and prosperous agricultural area, is a city of much importance commercially and from a sanitary standpoint, and with the interest manifested in these matters must add a wholesome influence in the cause of human progress in the amelioration of suffering and disease.

It is the province of such organizations as the American Public Health Association to keep alive and distribute the sacred fire of knowledge. What has been an art has become a science. In the middle ages plague, small pox, etc., swept the world with fearful havoc; pestilence, as then known, is now unknown; small pox is rarely ever seen as an epidemic, and yet sanitary science is but in its infancy. The day must soon come when diphtheria, typhoid fever, scarlatina, etc., etc., will be things of the past.

Respectfully submitted,

H. B. HORLBECK,

Health Officer.

REPORT OF TIDAL DRAIN KEEPER.

CHARLESTON, S. C., January 1st, 1892.

To the Honorable the Mayor and Aldermen of Charleston :

GENTLEMEN: I have the honor to submit the following report of the proceedings of this department for the past year.

REPORT OF TIDAL DRAIN DEPARTMENT FROM JANUARY 1ST,
1891, TO DECEMBER 31ST, 1891.

For cleaning out Tidal Drains and carting mud from same, 4,865 loads. Laborers paid for working in drain..	\$1,620 18
Cartage on mud.....	881 87
	—————\$2,502 05
Cameron & Barkley's bill to date for rope, shovels, wick for lamps, oils, nails, &c.....	52 31
C. J. Schlepegrell's bills to date for lumber, nails, &c., used in framing sand pit frames and covers.....	8 85
John C. Beaird's bill to date for one dozen lamps used in drains.....	3 00
J. F. Riley's bill to date for repairs to windlass.....	1 40
Extra cartage during year on sand pit frames and covers...	6 58
C. Seel for sharpening two saws	50
Salary for Tidal Drain Keeper up to date.....	1,000 00
Salary for two hands up to date.....	728 00
	—————
Total amount.....	\$4,302 69

Very respectfully,

M. HOGAN,

Tidal Drain Keeper.

DEPARTMENT OF CHARITIES.

The institutions in this Department, the Orphan House, Shirras Dispensary, City Hospital, Alms House, Old Folks' Home, and Enston Home, continue to be conducted with the same care, and for the best interests of the poor and sick of our city. No city in the South, and but few in the country make such ample provision for the unfortunates in their midst as our city does. With the amount expended under the direction of the Board of Health for the city sick, our appropriations for the current year amount to the sum of fifty-seven thousand three hundred dollars. The faithful work of the Boards of Commissioners and the officers of these institutions have long been recognized and appreciated by our citizens.

THE CHARLESTON ORPHAN HOUSE.

To the Hon. Mayor of Charleston, S. C. :

SIR :—I have the honor to submit the following annual report, viz :

From the Committee on School, Library, Purveyance and Supervision, and Committee on Binding Out, with statements showing Receipts and Expenditures of the Institution for the past fiscal year, 1891, up to December 31st, inclusive, with annexed statement of the Commissioners Trust Fund :

RECEIPTS.

Amount received from interest on Public Fund	\$ 8,984 24
Amount received from Commissioners' Trust Fund.....	3,111 55
Balance from City Treasury.....	11,249 51
	<hr/>
	\$23,245 30
	<hr/>

EXPENDITURES.

Amount expended from Public Fund as per monthly re- turns to City Council.....	\$ 18,933 75
Amount expended for Physician's salary... ..	\$ 700 00
For Insurance on House.....	500 00— 1,200 00
Amount expended from Commissioners' Trust Fund.....	3,111 55
	<hr/>
	\$23,245 30
	<hr/>

THE COMMITTEE ON SCHOOLS.

The Committee to whom was confided the supervising of the school connected with the Charleston Orphan House, present the subjoined report :

1891.

Highest number on register during the year :

Boys, 131—Girls, 111—Total 242

Average attendance :

Boys, 129—Girls, 109—Total 238

Admitted :

Boys, 12—Girls, 9—Total 21

Discharged :

Boys, 14—Girls, 9—Total 23

The sessions of the school have been conducted throughout the year with punctuality and regularity.

The studies embrace Reading, Writing, Orthography, Arithmetic, (mental and practical), Common School and Physical Geography, Ancient and Modern History, Familiar Science, Grammar, Vocal and Instrumental Music. In addition to these we have this year added Stenography and Type-Writing in the evening, which do not interfere with the other studies.

The first class will soon have completed the course, and your committee are pleased to state that the boys and girls trained in the Orphan House are finding remunerative positions in banks and other institutions in the city.

The Kindergarten now numbers 81, but a class of 24

will shortly be advanced to the Primary Department. The class from the Kindergarten mentioned in last year's report has done excellent work, reflecting great credit not only on the Kindergarten training, but also on its present teacher.

The entire School has maintained its usual standard. The reports of the past have been so full that there is but little left for your Committee to say; they would, however, remind the Board that the Teachers not only faithfully performed their duties in school, but assist the Principal in every way they can in carrying on the other work of the Institution.

Respectfully submitted, .

GEO. W. WILLIAMS,	} <i>Committee.</i>

Charleston, S. C., January 7, 1892.

COMMITTEE ON LIBRARY.

CHARLESTON, January 9th, 1892.

The Committee on Library report that the Library contains 3,313 volumes. The children have drawn out and read during the year 3,200 volumes. There has been added in new books during the year 52 volumes. The children continue to take great interest in reading, and those too young to read have been read to by the efficient Librarian, who has discharged the duties with zeal and fidelity.

Respectfully submitted,

H. H. DELEON, *Chairman.*
 FRANCIS J. PELZER.
 ANDREW SIMONDS.

THE BINDING OUT COMMITTEE.

The Binding Out Committee report that 15 children have been received into the House—8 boys and 7 girls.

Twenty-one children have been bound out—12 boys and 9 girls.

Such as have been heard of are giving satisfaction, with one or two exceptions.

Respectfully submitted,

THEO. D. JERVEY,
AUGUSTINE T. SMYTHE,
A. F. C. CRAMER,
Binding Out Committee.

January 7, 1892.

REPORT OF THE COMMITTEE ON PURVEYANCE CHARLESTON
ORPHAN HOUSE.

			<hr/>
			\$18,867 64

Respectfully submitted,

A. F. C. CRAMER.

GEO. W. WILLIAMS.

THE COMMITTEE ON REPAIRS.

The Committee on Repairs would beg leave to report that owing to the liberality of Council they were enabled in 1890 to paint the exterior walls of the house, which was much needed for some years. The interior is in fair condition, with the exception of the floors throughout the house, which have been laid for a number of years and require attention in many places. The committee would recommend early attention to this matter, either by adding cost of same to the appropriation asked for the year 1892, or asking the City Council for a special appropriation for that purpose.

The boiler used for the house having been in use for a long time was condemned by the inspector and a new one was ordered and contracted for by the Board, for the cost of which the Honorable the City Council have been petitioned for a special appropriation.

All of which is respectfully submitted by

E. F. SWEEGAN.

H. H. DELEON.

E. WILLIS.

Committee on Repairs.

Charleston, S. C., December 31, 1891.

THE COMMITTEE ON RETRENCHMENT AND REFORM.

To the Chairman and Board of Commissioners of the Charleston Orphan House :—

The Committee on Retrenchment and Reform begs leave respectfully to report that in their opinion the management of the institution is now as economically conducted as possible, and they have no recommendation to make.

All of which is respectfully submitted,

AUGUSTINE T. SMYTHE.

H. H. DELEON.

E. F. SWEEGAN.

Committee.

THE COMMITTEE ON IMPROVEMENT AND DISCIPLINE.

The Committee on improvement and Discipline respectfully report that they cannot see where any improvement can be made in the discipline of the house.

FRANCIS J. PELZER.

GEO. W. WILLIAMS.

E. WILLIS.

H. H. DELEON.

E. F. SWEEGAN.

SUNDAY SCHOOL.

The work of the Sunday School has been uninterrupted—though we find great difficulty in obtaining teachers; those now engaged in teaching, are, with but three exceptions from the School and House.

Mr. Cook, the former Superintendent, left the city some time ago, and Mr. Knox, one of the teachers, has been filling his place faithfully ever since. Mr. Miscally, an earnest and devoted teacher, has been with us for over 20 years.

School opens at 9, and is continued for a little over an hour.

CHAPEL.

The Chapel has not been closed once during the year—the usual afternoon services having been conducted by the resident Clergy (who always cheerfully respond to the calls made upon them), and eleven visiting ministers.

The Commissioners gratefully acknowledge these services.

The music is still an attractive feature, and the pews in the Chapel reserved for visitors, are usually fully occupied, showing the continued interest of the citizens in this noble work.

SANITARY.

The Sanitary condition of the Institution is excellent, and the general health of the children remarkable. We have to record but one death—Edward Antibus, aged 13, who died after a few hours illness, Dec. 20th, of congestion of the

brain. He was interred in the Children's Lot, at Magnolia Cemetery.

A careful perusal of the foregoing full and interesting reports demonstrate that the high standard and character of this noble Institution has been fully maintained in every particular, and I deem it but just to render my testimony to the intelligent, faithful and devoted services of our Principal, who, with God's blessing, has achieved such beneficent results in the management of our Orphan House.

Respectfully submitted,

JACOB SMALL,

*Chairman of Board of Commissioners of
Charleston Orphan House.*

CITY HOSPITAL.

CHARLESTON, S. C., March 31, 1892.

To the Honorable Mayor of the City of Charleston :

DEAR SIR :—Now ask to hand you under the Annual Report of City Hospital to 31st December, 1891. Table A. shows 1,171 patients treated during the year. B, that 96 patients remained in Hospital, 31st December.

C. That the expenses for year.....	\$18,903 60
Earnings.....	4,677 41
Assets.....	3,191 00

I cannot do less than to call your attention to the serious and growing evil of forcing the insane into the Hospital, to be ultimately sent to asylum, at expense of the city, instead of the county, and ask that the city attorney be requested to adjust it, so the county will send the insane to Columbia as provided by law, and not to City Hospital except in extreme cases.

I am, with great respect,

E. WILLIS.

Chairman Hospital Board.

Hon. J. F. FICKEN, Mayor.

THE ALMS HOUSE.

OFFICE OF COMMISSIONER OF CITY ALMS HOUSE, }
 CHARLESTON, S. C., January 12th, 1892. }

To the Honorable Mayor and

Aldermen of the City of Charleston, S. C.:

GENTLEMEN:—Enclosed please find Master's report of the Alms House, for the fiscal year ending 31st December, 1891, as presented to the Board of Commissioners, and by them ordered to be sent to your Honorable body.

It affords us pleasure to state that the amount necessary for the maintenance of the Alms House, for the past year, has been \$8,094.12, leaving a balance of \$5.88 to credit of appropriation.

The public transportation account I have, by careful attention to the same, examined each case or applicant, and feel that all deserving applicants have received transportation to their homes, notwithstanding the fact that a large number of applicants have been sent to me by other associations of charity.

I report the amount expended for this account for the fiscal year ending December 31st, 1891, to be \$399.11,

leaving a balance of \$100.89 to the credit of the appropriation. All of which is respectfully submitted.

Very respectfully,

EDW. S. BURNHAM,

Chairman B. C. A. H.

CHARLESTON, S. C., January 11th, 1892.

To the Board of Commissioners of Alms House :

GENTLEMEN :—I have the honor to present for your consideration, in accordance with the rules, the following report for the fiscal year ended December 31st, 1891.

There were admitted into the Institution during the year fifty-three persons, classified as follows :

Admitted.

Males.....	27.	Females.....	25.	Children.....	1.	Total.....	53

The total amount expended during the year.....	\$8,094	12
--	---------	----

The same care has been taken of the inmates, most of whom are persons quite aged and utterly incapable of helping themselves, as heretofore.

They have been supplied with substantial and wholesome food and raiments; everything has been done to make them comfortable.

The sick have likewise been attended to and nursed with

care. The physician in charge has been prompt in responding to my calls.

Such of the inmates who were able were required to assist in the work of the House.

The average number of persons in the House during the year were seventy-three.

Permit me, gentlemen, to say in conclusion, that I have endeavored to perform the duties of my office with fidelity and impartiality, and assure you that since my official connection with the House it has been my aim and purpose, and I have at all times endeavored to act in the interest of the Institution, and to execute the orders of your Board.

I am not unmindful of your kind consideration, and thank you most heartily for the same.

Respectfully submitted,

H. G. FRAZER,
Master City Alms House.

ANNUAL REPORT OF TRUSTEES OF WILLIAM
ENSTON HOME FOR 1891.

CHARLESTON, S. C., January 27, 1892.

To the Honorable the City Council of Charleston :

The Trustees beg leave to report, that the affairs of the Home have progressed satisfactorily during the past year; the general health of the village continues good, no case of local sickness occurring during the year.

There were three deaths in 1891; one between fifty and sixty, one between sixty and seventy, and one over eighty years of age; one was admitted with an incurable disease, and one died of old age.

The cottages are all in good order, and as a general condition are neatly kept; the residents express themselves pleased with the accommodations.

The Memorial Hall is kept supplied with magazines and newspapers, and it is intended to form a library there. The main apartment is nicely furnished, and is used for religious purposes at the pleasure of residents.

Herewith the Trustees send their annual financial statements, which show that, with close economy, the income has been sufficient for necessary current expenses.

Respectfully submitted,

WM. A. COURTENAY, *President.*

WM. ENSTON HOME.

WM. A. COURTENAY,
JNO. F. FICKEN,
W. ENSTON BUTLER,

Trustees.

E. E. Charleston, December 31, 1891.

FIRE DEPARTMENT.

This department continues to be most efficient. The addition of a chemical engine would be a decided improvement. The report of the Firemasters is most elaborate, and gives in full the work of the department during the year:

OFFICE BOARD OF FIRE MASTERS, }
CHARLESTON, S. C., January 1st 1892. }

To the Hon. the Mayor and City Council of Charleston:

The Board of Fire Masters respectfully submit the operations of this Department for the year 1891, and its condition at this date, as contained in the annexed statements, which will show:

The force of the Department.

Condensed expenses from 1st January to 31st December, 1891.

Summary of expenses by companies from January 1st to December 31st, 1891.

Record of fires for the year 1891.

Inventory of property 31st December, 1891.

Comparative statement of property at risk, insurance and loss.

FRANCIS S. RODGERS,

Chairman Board Fire Masters.

FORCE OF THE FIRE DEPARTMENT, DECEMBER 31ST, 1891

103 Officers and Men.

7 Steam Fire Engines in service.

2 Steam Fire Engines in reserve.

2 Steam Fire Engines condemned.

8,934 Feet of Hose.

2 Fuel Wagons.

3 Alarm Bells, and a complete system of Fire Alarm Telegraph.

2 Hook and Ladder Trucks.

7 Hose Carriages.

31 Horses, four of which are unfit for service.

POLICE DEPARTMENT.

The faithful and intelligent work of the head of this department speaks for itself. His long connection with the police force (extending over twenty years) and familiarity with the service, coupled with his high, personal character, has produced the best results. Though extra policemen had to be employed, owing to sickness, the expenses of the department were kept within the appropriation, and there was a balance to its credit of \$1,784.76 at the end of the year.

ANNUAL REPORT OF CHIEF OF POLICE.

CENTRAL STATION OFFICE CHIEF OF POLICE, }
 CHARLESTON, S. C., January, 1892. }

To the Honorable the Mayor and City Council of the City of Charleston :

I respectfully submit my Fifth Annual Report as Chief of Police for the fiscal year ending December 31st, 1891.

The force has been maintained during the year at its full strength, viz :

One Chief.	Four Line Sergeants.	Two Daymen.
Three Lieutenants.	Three Detectives.	Three Drivers.
One Electrician.	Eighty Privates.	
Two Orderly Sergeants.	Two Gate Sentinels.	

During the latter part January, and up to the 15th February, the Police force suffered from a serious attack of LaGrippe, placing on an average twenty Policemen on the sick list from that cause alone. Eight special Police were added to the roll, doing duty to February 15th, and paid from the Police appropriation ; since then the health of the

Department until December was very good, when the force was again afflicted from the same cause.

I regret to report, that on the night of October 11th, Private Eanes was shot and killed by Private Quinlivan; also report the death of Private Leddy, one of the oldest and most esteemed members of the force, at his residence, October 31st.

Twenty privates and three drivers were discharged for cause, and twenty-two privates resigned. The vacancies were filled as they occurred.

The city has been exceptionally quiet the past year. The total number of arrests for all causes was 3,301, a slight increase over the previous year.

Amount of fines imposed.....	\$8,331 00	Paid.....	\$4,605 00
Amount of fines imposed in 1890.. 7,551 00	Paid . . .	4,346 50
Increase.....	\$780 00		\$259 50

The Police, Signal and Telephone Service has been kept up, and maintained very economically and its efficiency improved.

During the year one extra Police Telephone box was placed at the corner of Line and Payne streets, costing for box, extra wire, poles and labor, \$200.

Sections 465, 466, 467, 468, 469, 470 and 471 of the City Ordinances, as ratified by Council February 10th, 1891, was practically put into force on Monday, March 9th, and discontinued April 9th, during which time 104 dogs were captured and disposed of as follows; 79 killed, 24 redeemed, 1 escaped.

On June 1st an order was given to re-open the Dog Pound. Every effort was made to obtain a suitable dog catcher, by advertisement and otherwise. No one could be induced to accept the position. In consequence the pound was closed, and no further action taken, except to Section 470, which has been enforced to the present time.

Great improvements have been made to the quarters, by

making closets for clothing, the whole building kept in repair, and everything paid for out of the appropriation for the Department, and leaving a balance to credit of \$1,784.76 on December 31st, 1891.

Yours respectfully,

JOSEPH GOLDEN,

Chief of Police.

Report of the Chief of Police to the Honorable Mayor and City Council of Charleston, showing the Number of Persons Arrested in the City of Charleston during the Year Ending December 31st, 1891, and the cause of their arrest.

ANNUAL REPORT OF SUPERINTENDENT ARCHER.

OFFICE OF THE SUPERINTENDENT OF CITY PUBLIC SCHOOLS,
CHARLESTON, December 31st, 1891.

To the Honorable the City Board of Public School Commissioners :

GENTLEMEN : I have the honor to submit herewith my report of the operations of your Schools for the year just ended :

Number of Pupils enrolled.....	5,237
Number of Pupils re-admitted.....	584
Number of Pupils withdrawn.....	686
Number of Pupils on register to date.....	5,135
Net gain on enrollment of 1890.....	26

The average daily attendance of pupils was as follows :

Bennett School, Mr. Clement, Principal.....	756
Courtenay School, Mr. Finger, Principal.....	732
Crafts School, Mr. Seabrook, Principal.....	718
Memminger School, Miss Simonton, Principal.....	234
Morris Street School, Mr. Hill, Principal.....	1,274
Shaw School. Mr. Carroll, Principal.....	1,009
Total.....	4,723

Average per centage of daily attendance, 92.

The average percentage of daily attendance for 1890 was 94.

The average daily attendance for the past year was, therefore, two per cent. less, and is accounted for by sickness. The attendance of the teachers, I am sorry to report, was very much interfered with, by the prevailing influenza.

During the year there were 63 days of absence, but in no case were the classes dismissed, nor the work of the schools suspended. The services of the extra teachers were called

into immediate requisition, and the interests of the pupils were in no wise prejudiced.

The practical experience obtained by the extra teachers during their temporary employment was of great value to them, since it qualified many for positions subsequently filled, and enabled the Board to obtain skilled and well trained teachers for their schools. I find from the reports of other cities, that these extra teachers, or supernumeraries as they are called elsewhere, are required to report daily to the office of the Superintendent, and to remain there till midday, subject to call. Should their services not be needed, they spend the remainder of the day's session at some school in their District, and improve their time by observing the methods pursued. The arrangement is a good one, and I respectfully recommend its adoption here.

I take pleasure in saying, that the work done during the past year was creditable alike to pupils and teachers. Many of the boys, on the completion of their course at the grammar schools, entered the High School of Charleston, or the Porter Academy, and, from what I can learn, are holding their own in classes of large and intelligent membership. The girls, with but a few exceptions, after leaving the grammar grades, entered the Memminger High School, and are pursuing their studies with a view to graduation in due course of time.

The Commencement Exercises of this excellent School were held in July, and diplomas were presented to the graduates by the Chairman of the Board. The honors of the class of 1891 were won by Miss Ellen Frost Hayne, and the "Mitchell" prize for composition by Miss Gertrude E. Burges.

It is with sincere regret that I report the death of Miss Caroline C. Harbers, the estimable and efficient principal of the Girls' Department of the Bennett School. Miss Harbers was a typical teacher of the "old school;" earnest, pains-taking, and conscientious; she did her work thoroughly, and was opposed to change merely for the sake of change. Her connection with the school dates as far back

as March, 1858, when she entered the St. Philip Street School as the sixth assistant teacher in the Primary Department. On the 27th of February, 1860, she was promoted to the position of third assistant teacher in the Boys' Department, where she taught most acceptably till February, 1861. In December of that year she was transferred to the Friend Street School, and taught the second class in its Boys' Department till the destruction of the school house by fire.

At the opening of the schools in January, 1867, she was unanimously elected the first assistant teacher in the Boys' Department of the Bennett School, and in September of the same year was promoted to the principalship of the Girls' Department—a position which she held with credit to the day of her death. With but two exceptions she had been longest in the service of the schools, having taught for thirty-three years. She is dead, but she yet speaketh in the lives and example of those whom she taught.

On the evening of the 2d of December, the last monthly meeting of the Board was held, and in fitting recognition of the zeal and fidelity of your Chairman, the following resolutions were unanimously adopted :

“Whereas, it is proper, when opportunity offers, for the
“public, of itself or through its representatives, to give substantial evidence of its appreciation of those whose services
“have redounded to the weal of the people; and whereas,
“the Hon. Charles H. Simonton, the distinguished Chairman of this Board, whether as a private citizen, legislator,
“jurist or School Commissioner, has done good and faithful
“service for this city and for his State, and particularly in
“the cause of Education; Be it, therefore,

“*Resolved*, That in consideration of Judge Simonton's
“eminent services, and as a sign, though not the measure
“of the estimate in which they are held by the City Board
“of Public School Commissioners, the school heretofore
“known as the Morris Street School be named, designated,
“and hereafter known as the Simonton School.”

The Morris street school house was the only remaining one of the six school buildings which bore the name of the street on which it was situated, and the change of name was both timely and appropriate.

In concluding this report, I beg to thank the members of the Board who will retire from office at the end of their term—Commissioners Hamett, Olney and O'Driscoll—for their uniform courtesy and kindness during the past four years. To the remaining members I also tender my grateful acknowledgments.

Respectfully,

HENRY P. ARCHER,

Superintendent City Public Schools.

HIGH SCHOOL OF CHARLESTON.

CHARLESTON, S. C., March 21, 1892.

To his Honor the Mayor, and the City Council of Charleston :

GENTLEMEN:—It gives me great pleasure to hand you herewith the admirable report of Mr. Dibble, Principal of the High School of Charleston.

I heartily endorse the views of the Report, especially the part bringing to the attention of our community the necessity of a building for carrying on the work with still greater success for the welfare of education in our midst.

The very large number of pupils in attendance is the best evidence of the advantages the School offers, and we hope in a few years to have a well adapted structure to satisfy the increased interest taken by our people in the mental culture of their children.

With great respect,

JULIAN MITCHELL,

President of the Trustees of the High School of Charleston.

CHARLESTON, January 20, 1892.

The President and Trustees of High School of Charleston :

GENTLEMEN:—The attendance at the School for the several sessions of the past year has been as follows :

JANUARY 5 TO MARCH 31.

First Class.....	15 Pupils.
Second Class.....	21 “
Third Class.....	30 “
Fourth Class.....	55 “
Preparatory Class.....	21 “
Total.....	142

APRIL 1 TO JUNE 26.

First Class.....	15 Pupils.
Second Class.....	21 “
Third Class.....	24 “
Fourth Class.....	54 “
Preparatory Class.....	19 “
Total.....	133 “

OCTOBER 5 TO DECEMBER 31.

First Class.....	13 Pupils.
Second Class.....	17 “
Third Class.....	44 “
Fourth Class.....	89 “
Preparatory Class.....	20 “
Total.....	183 “

The large increase in the enrollment of pupils for the session ending December 31, the first of the present school year, is very gratifying. Only once before since the reorganization of the school, (after the earthquake, when most of the schools in the city were closed for a time,) has the attendance been as large. I have reason to believe that we will be able to retain a larger proportion than usual of our accessions, and if so we may confidently expect that the school will soon pass beyond the highest enrollment ever reached.

In consequence of the large number in the fourth class, it became necessary to divide the class into three sections,

and an addition to the Faculty of the school was determined upon. The Trustees were fortunate in securing the services of Mr. Robert V. Royall, of Mount Pleasant, a teacher who has had an extended experience in the school room. Mr. Royall's work with us has been chiefly in the preparatory class, and the progress and attainments of his pupils show his ability and painstaking industry.

Through all the classes of the school, and in every department of study, good work is being done. The monthly averages of the classes have, in almost every instance, been above those of past years, and the examinations this year, both mid-year and final, will show very satisfactory results attained by the pupils of the school.

In this connection it affords me pleasure to speak of the thorough preparation of most of those who came to us after having completed the course of study at the Public Schools. The section of the fourth class to which these were assigned, is probably the best that we have ever had, and the intelligence and earnestness of the boys composing it, are a practical tribute to the faithfulness of their former teachers, and render easy and pleasant the work of those now in charge of them.

At the Commencement, held June 26, fourteen members of the first class, having met the requirements for graduation, were awarded diplomas. Their names are as follows: Messrs. Charles P. Aimar, Jr., Matt. B. Barkeley, Levin Brown, Thos. W. Carroll, Virgil C. Dibble, Jr., Wm. L. Erckmann, Frank L. Frost, Jr., Frederick Geddings, Henry F. Hayne, C. Julian Huguenin, Jr., Wm. O'D. Langley, Thomas G. Prioleau, C. Eugene Welling, Geo. W. Witte, Jr. No class graduating from the school has ever given as general satisfaction to their teachers as this class, and if the young gentlemen composing it show as much fixedness of purpose and steadiness of application in the future, as during their school days, they will achieve large success in their life work. Seven of the graduates are at Charleston College and doing well; four are at other colleges; the others have entered business.

The Peabody medals were won by Messrs. Henry F. Hayne, of the first class—next in merit, Levin Brown—and Claude Burckmyer, of the second class—next in merit, Lewis M. Hamlin. These young gentlemen had, in their respective classes, acquitted themselves very handsomely, and their record as students showed them fully worthy of the honor conferred upon them. The Hon. W. A. Courtenay, a Trustee of the School and also a Trustee of the Peabody Education Fund, presented the medals.

There was awarded also, at the Commencement, the Ferguson Colcock Conduct Medal. This medal is connected with a very interesting and touching piece of history. Master W. Ferguson Colcock, Jr., of Green Pond, S. C., a lad of singularly pure and manly character, entered the preparatory class of the High School in May, 1886. He continued a pupil of the school, rising each year with his class, until he finally reached the first class. In February 1890, four months before the graduation of his class, under a mysterious dispensation of Providence he was stricken down by disease, and after an illness of a few days only he closed his eyes in death, ending an earthly career that had seemed so full of promise.

He had been very ardently attached to his school, speaking frequently, and even during the days just preceding his death, of his teachers and his classmates in the most affectionate terms.

After his death, his father, treasuring the remembrance of his son's devotion to the school, purchased with money which had been Ferguson's, some City Bonds and conveyed them to the Trustees, with the request that the interest be used each year to procure a Conduct Medal, to be presented to the member of the first class who, at graduation, should be judged most worthy. The Trustees accepted the gift, and established the Ferguson Colcock Conduct Medal.

And thus now, and henceforth in the years to come, the boys in the first class may engage in a generous rivalry in noble words and deeds, and a lad whose life was that of a high toned Christian gentleman, though dead, will yet

speak and be an inspiration to others to lead upright, manly lives.

The presentation of the medal was a surprise to the boys. An expression of their opinion as to the best boy among them had, however, been obtained, and the Faculty of the school concurring, to Master C. Eugene Welling the medal for 1891 was assigned.

The Hon. C. R. Miles, one of the Trustees of the School, in an address embodying the loftiest sentiments, couched in singularly appropriate language, presented the medal.

The flourishing condition of the school, which, after passing its fiftieth year, has all the vigor of its youth, and which is affording educational advantages to so many of our boys, is a matter upon which our people can congratulate themselves. No Charleston boy need go away from home to prepare for college, and those who have no college aspirations can find here all the training which belongs to a Classical High School course. The graduates of the school are prominent in the learned professions, as civil and mechanical engineers, and in every department of active employment where brain power is demanded. Our community has a reputation for culture which is not confined within State limits. To the building up of this reputation the influence exerted by the High School for more than half a century has contributed not a little.

In each report for several years past, I have asserted the need of a properly constructed and properly located building, that the largest possibilities of the school might be realized. I wish at this time to emphasize the statement, and to express the hope that in the near future the measures inaugurated to secure a new school house may find their accomplishment. If to the 180 boys now enjoying the advantages of the school, there shall be next year the accessions anticipated, it will not be easy in the present building to so distribute and classify the boys in attendance as to do justice to all. Besides, a city as wealthy as Charleston, and with its reputation for interest in education, should have a home for its High School which would be at once a blessing to

its sons and an ornament to be admired by all. Other cities—in New England, the Middle States, the West and also in our sister States of the South—count it the soundest financial policy, and the most practical economy, to provide the best facilities for those desiring more than the common school education, so as to keep their boys and young men at home, and to attract those of the surrounding country.

The time has come—the opportunity presents itself—for Charleston to put itself abreast of other cities, its friends and its rivals.

Respectfully submitted,

VIRGIL C. DIBBLE,

Principal.

COLLEGE OF CHARLESTON.

CHARLESTON, March 1st, 1892.

Hon. Ch. R. Miles, President Board of Trustees, College of Charleston.

DEAR SIR.—The work of the College has moved on both harmoniously and efficiently during the period embraced in this report. Every possible effort has been made by the Faculty to expand the sphere of its influence and usefulness, and to render its benefits freely accessible to all who would avail themselves of them—such for example, as lectures upon Natural History and Geology, Archæology and English Literature. University extension as it is termed in Great Britain, has been in effect practised by the College of Charleston during the last five or six years. It is our constant endeavor to bring knowledge out of her cloistered seclusion and make her dwell with men.

The beneficent results of our labors will be more apparent to succeeding generations, than to that which is contemporary with us, and our hope, stimulus and inspiration are principally derived from this conviction. The Academic character of the college advances with every successive year.

We have not a single department that in quality of its teaching, can be described as inefficient or inadequate.

Our work is seriously hampered by the want of modern appliances and instruments of culture, in the form of books and apparatus, which the condition of our financial resources renders it impossible for us to obtain even in a moderate degree. Want of means, and the absence of co-operation or general support, embody in concise terms, all the obstacles against which we are contending. When I reflect upon the depressing and seemingly hopeless situation of the college in this respect, I am sometimes amazed at the results which it achieves. No institution in the history of human culture, with an environment so unpropitious and adverse, has been more productive of good or richer in benefits. Our Alumni are attaining from year to year, positions of recognized honor and distinction in academic and professional circles.

Many conspicuous illustrations might be cited in proof of this general declaration. In conclusion, I can merely re-affirm my previous statements, that the College of Charleston, if properly nurtured and cherished, will speedily ascend to a degree of excellence and efficiency unexcelled by any similar institution in the United States.

I am with sincere respect,

HENRY E. SHEPHERD,

President College of Charleston.

On the 21st July, 1891, the Washington Light Infantry unveiled in Washington Square, a granite Shaft, commemorating their comrades who laid down their lives in the war between the States. The City Council had granted permission for this use of the Square. The monument is an ornament to the city. Its preparation and erection are the result of efforts of members of that company. A large audience attended upon the occasion, and the address was delivered by the Hon. Charles H. Simonton, a former Captain of the Washington Light Infantry.

As this occasion was one of public interest, I have deemed it proper to publish the Address as an Appendix to these Annual Reports, so that it might be preserved in permanent form.

G. D. BRYAN, *Mayor.*

ORDINANCES RATIFIED DURING THE YEAR 1891.

AN ORDINANCE TO REPEAL SECTION 465, 466 AND 467 OF THE REVISED ORDINANCES OF THE CITY OF CHARLESTON, RATIFIED SEPTEMBER 26TH, 1882, AND TO ENACT OTHER SECTIONS IN LIEU OF THE SECTIONS AS STRICKEN OUT.

Be it ordained, by the Mayor and Aldermen of the City of Charleston, in City Council assembled, and by the authority of the same, That Section 465, 466 and 467 of the Revised Ordinances of the City of Charleston, ratified September 26th, 1882, be, and the same are hereby repealed, and the following sections inserted in lieu thereof, that is to say:

SECTION 465. The City Treasurer shall annually provide a sufficient number of metal badges suitable for dogs, numbered from one upwards.

SEC. 466. Any person or persons owning, keeping or having a dog or dogs within the limits of the city shall pay annually to the City Treasurer the sum of two dollars and fifty cents for each and every dog so kept; to whom the City Treasurer shall deliver a badge or license, as provided in Section 465, which said badge or license shall be in lieu of any taxation by the City Council on said dog or dogs. Any dog found within the limits of the city without such badge or license, shall be killed by the police or by such person or persons as the Mayor may appoint.

SEC. 467. All licensed dogs found going at large in the City of Charleston, shall be taken up and detained in some suitable place by such person or persons as the Mayor may appoint, and the owner or person entitled to the control of such dog or dogs so taken up and detained, shall pay a fine of one dollar for every dog so taken up. All licensed dogs so taken up and not redeemed by the payment of said fine within three days shall be killed under the direction of the chief of police or such person as the Mayor may appoint.

All ordinances and parts of ordinances inconsistent with this ordinance are hereby repealed

Ratified January 13, 1891.

AN ORDINANCE TO ABOLISH THE UPPER MARKET, SITUATE AT THE NORTHWEST CORNER OF VANDERHORST AND ST. PHILIP STS.

SECTION 1. *Be it ordained*, by the Mayor and Aldermen of the City of Charleston, in City Council Assembled, and by the authority of the same, That from and after the twelfth day of December, Anno

Domini, eighteen hundred and ninety-one, the Market situate at the northwest corner of Vanderhorst and St. Philip streets, in the City of Charleston, and known as the Upper Market, be, and the same is hereby abolished.

SEC. 2. That all ordinances and parts of ordinances conflicting with this ordinance be, and the same are hereby, repealed, in so far as they relate to the said Upper Market, and no further; and the powers and duties of the board of commissioners of the markets shall be, and remain, unaffected by this ordinance, except so far as they relate to the said Upper Market.

Ratified December 8th, 1891.

AN ORDINANCE TO REPEAL SECTIONS 465, 466, 467 AND 468 OF THE REVISED ORDINANCES OF THE CITY OF CHARLESTON, AND ALL AMENDMENTS OR SUBSTITUTES THEREFOR, AND TO ENACT OTHER SECTIONS IN LIEU THEREOF:

Be it Ordained by the Mayor and Aldermen of the City of Charleston, in City Council assembled, and by the authority of the same, That Sections 465, 466, 467 and 468 of the Revised Ordinances of the City of Charleston, and all amendments or substitutes therefor, be, and the same are hereby repealed, and the following Sections inserted in lieu thereof, that is to say,

SECTION 465. Any person or persons owning, keeping or having a dog or dogs within the limits of this City shall, annually, before the first day of March, pay to the City Treasurer the sum of two and a half dollars for a badge or license, which shall be fastened upon the collar of such dog or dogs, which shall permit such dog or dogs to go at large under charge of a responsible party, and be in lieu of any other taxation on such dog or dogs.

SEC. 466. The City Treasurer shall annually provide a sufficient number of metal badges suitable for dogs, numbered from one upwards, and with the year of their issue stamped on them, to be issued as stated in Section 465; that the name and residence of each party to whom a badge has been issued and the number of such badge to be kept on file in the City Treasurer's office, for the purpose of identification in case such badge should at any time be lost, stolen or otherwise misappropriated.

SEC. 467. No dog licensed or otherwise shall go at large in this City, except in charge of the owner or some responsible person. Any licensed dog so found shall be caught and returned to the owner, and a fine of one dollar be exacted. If said fine is not paid within three days, the said dog shall be slain. Any unlicensed dog found going at large in the City of Charleston, shall be taken up and

detained in some suitable place by such person or persons as the Mayor shall appoint, and if the said dog or dogs shall not be redeemed as hereinafter provided, within three days said dog or dogs shall be slain: Provided, however, that any such dog so taken up may be redeemed upon exhibiting a receipt from the City Treasurer, showing that the license hereby imposed upon such dog has been paid, and upon the further payment of a fine of one dollar.

SEC. 468. Whosoever shall wrongfully remove the badge from or steal a licensed dog, or wrongfully kills, maims, entices or carries away any such dog, shall be punished by fine not less than twenty dollars or imprisonment for not less than thirty days, or both.

That it shall be the duty of the Pound Keeper, to be appointed by the Mayor, to keep a registered roster, from day to day, of the dogs received and a description of the same, and the name and residence of each party bringing in each dog.

SEC. 469. If any owner or possessor of a fierce or dangerous dog, licensed or not licensed, shall permit the same to go at large in the City, to the danger or annoyance of any of the inhabitants, he, she or they shall be liable to a fine of not less than ten dollars nor more than twenty dollars, and upon a second conviction for the same offence the Chief of Police shall cause the said dog to be slain.

SEC. 470. All bitches running at large while in heat, licensed or not licensed, shall be slain forthwith.

SEC. 471. That whenever it shall be made to appear to the Mayor that there are good reasons for believing that any dog or dogs within the City are mad, it shall be the duty of the Mayor to issue a proclamation requiring that all dogs shall, for a period to be defined in the proclamation, wear a good and substantial muzzle, securely put on, so as to prevent their biting, and any dog going at large during that period defined by the Mayor without such muzzle shall be impounded, and if said dog shall not be redeemed within three days, by the payment of a fine of one dollar, such dog shall be slain.

Ratified February 10th, 1891.

AN ACT TO AMEND SECTION 23, OF AN ACT ENTITLED "AN ACT TO REGULATE PILOTAGE AT THE PORT OF CHARLESTON.

SECTION 1. *Be it Enacted* by the Senate and House of Representatives of the State of South Carolina, now met and sitting in General Assembly, and by the authority of the same, that an Act entitled "An Act to Regulate the Pilotage at the Port of Charleston," approved March 4th, 1878, be amended as follows: That Section 23 of said Act be amended so as to read as follows:

SEC. 23. That the Board of Commissioners of Pilotage for the Port of Charleston shall have the power and authority to prescribe to the licensed pilots for the bar and harbor of Charleston such orders and regulations not inconsistent with this Act; to arbitrate and adjudge all questions of dispute between pilots as to the pilotage of outward and inward bound vessels, as to them, or a majority of them, may appear suitable and proper; and any such pilot neglecting or refusing to conform to any such order or regulation shall be suspended for not more than three (3) months, or fined in a sum not exceeding one hundred dollars, or both, at the discretion of the said Board of Commissioners, or a majority of them.

Approved December 22nd, A. D. 1891.

20 Statute, 1269.

AN ACT TO AUTHORIZE AND REQUIRE THE COMMISSIONERS OF
PILOTAGE FOR THE PORT OF CHARLESTON TO ESTABLISH
STATION BOATS ON THE BAR OF CHARLESTON.

SECTION. 1. *Be it enacted*, by the Senate and House of Representatives of the State of South Carolina, now met and sitting in General Assembly, and by the authority of the same, that the Board of Commissioners of Pilotage for the Port of Charleston shall have the power, and are hereby authorized, to establish Station Boats on the Bar of Charleston.

SEC. 2. That each regular licensed pilot boat for the harbor and bar of Charleston shall perform and keep station duty, unless prevented by stress of weather, at or near the Bar of Charleston, alternately, for six days each, whenever it becomes the turn of such said pilot boat to perform the same, or to furnish as a substitute another licensed pilot boat, under a penalty of fifty dollars for each day's of fence; said pilot boat to be in charge of a full branch licensed pilot for the bar and harbor of Charleston, and the services of any pilot boat when on station shall be free of charge.

SEC. 3. That the Board of Commissioners of Pilotage shall have power, and are hereby authorized to make such rules and regulations for the governing of station boats on duty not inconsistent with this Act as to them, or a majority of them, may appear suitable and proper; and any such pilot boat refusing or neglecting to conform to any such rules and regulations, the pilot at the time in command shall be subject to a fine in the sum of not exceeding fifty dollars, or in case of non-payment of fine imposed within thirty (30) days, be suspended for not over sixty (60) days.

SEC. 4. That all fines collected under the provisions of this Act shall be paid over to the Board of Harbor Commissioners for the Harbor of Charleston, and by them used and disbursed.

SEC. 5. That all Acts or parts of Acts inconsistent with this Act be, and the same are hereby repealed.

Approved December 16th, A. D., 1891.

20 Statutes, page 1268.

AN ACT RELATING TO THE SALARY OF THE SCHOOL COMMISSIONER
FOR CHARLESTON COUNTY.

Section 1. BE IT ENACTED by the Senate and House of Representatives of the State of South Carolina, now met and sitting in General Assembly, and by the authority of the same, That from and after the passage of this Act, the School Commissioner for Charleston County shall be paid a stated salary of six hundred dollars per annum, payable by the County Treasurer in equal monthly installments, which salary shall cover also all traveling expenses that may be incurred.

Section 2. That all Acts or parts of Acts inconsistent herewith, be, and the same are hereby repealed.

Approved December 22nd, A. D., 1891.

20 Statutes, page 1268.

AN ACT TO AUTHORIZE THE CITY COUNCIL OF CHARLESTON TO
ISSUE COUPON BONDS, AT A RATE OF INTEREST NOT EXCEEDING
FIVE PER CENT. PER ANNUM, FOR THE PURPOSE OF TAKING UP
OR EXCHANGING THE SEVEN PER CENT COUPON BONDS OF
SAID CITY, MATURING IN 1892, 1893, 1894, 1895, 1896 AND 1897.

WHEREAS, certain seven per cent. coupon bonds of the City of Charleston, heretofore issued pursuant to law, will become due as follows, that is to say:—

In 1892, seventy thousand dollars (\$70,000); in 1893, sixty-two thousand one hundred dollars (\$62,100); in 1894, seventy-three thousand seven hundred dollars (\$73,700); in 1895, ninety-one thousand five hundred dollars (\$91,500); in 1896, sixty-seven thousand dollars (\$67,000); in 1897, twenty thousand dollars (\$20,000); aggregating three hundred and eighty-four thousand three hundred dollars (\$384,300.) AND WHEREAS, it is the desire of the City Council of Charleston to provide for the payment or exchange of the said bonds, so maturing as aforesaid, by the issue of new bonds, in the aggregate not exceeding the said sum of three hundred and eighty-four thousand three hundred dollars, and bearing interest at a rate not exceeding five per centum per annum. Now, therefore,

SECTION 1. BE IT ENACTED by the Senate and House of Representatives of the State of South Carolina, now met and sitting in General Assembly, and by the authority of the same, That for the

purpose of the payment or exchange of the seven per cent. coupon bonds of the City of Charleston, falling due in 1892, 1893, 1894, 1895, 1896 and 1897, the City Council of Charleston be, and they are hereby authorized and empowered, from time to time, to execute and issue coupon bonds, payable in thirty years from their respective dates, to an amount not exceeding in the aggregate three hundred and eighty-four thousand three hundred dollars, said bonds to bear interest at a rate not exceeding five per centum. per annum, payable semi-annually, and to be exchanged at par for the said seven per cent. bonds maturing as aforesaid, and to bear date from the date of the payment or exchange of said bonds for which they shall be respectively exchanged.

Section 2 That the said bonds shall not be taxable by the City of Charleston for any purpose whatsoever, and the coupons shall be receivable in payment of taxes due to the said City.

Section 3. That the principal and interest of said bonds shall be payable at such places as the City Council may by ordinance provide.

Approved December 16th, A. D., 1891.

See 20 Statutes at Large, page 1271.

AN ACT TO REMOVE ANY DOUBT AS TO THE DUTY OF THE SUPERVISOR OF REGISTRATION FOR CHARLESTON COUNTY, IN REGARD TO THE ELECTION OF MAYOR AND ALDERMEN OF THE CITY OF CHARLESTON, AND TO MAKE PROVISION IN CASE OF ANY FAILURE, NEGLECT OR INABILITY TO PERFORM SAID DUTY.

WHEREAS, doubts have arisen as to the duty of the Supervisor of Registration for Charleston County in regard to the election of Mayor and Aldermen of the City of Charleston under the provisions of an Act, approved December 24th, 1890, and entitled "An act to amend Part 1, Title 2, Chapter 10, Section 163, of the General Statutes of South Carolina, relating to the location and names of voting precincts, and Acts amendatory thereof, so far as the same relate to the voting precincts in the City of Charleston, to rearrange the said precincts for all elections, whether State, Federal or Municipal, and to provide for a revision of the registration of electors in accordance therewith." Therefore,

SECTION 1. BE IT ENACTED by the Senate and House of Representatives of the State of South Carolina, now met and sitting in General Assembly, and by the authority of the same, That at each and every election of Mayor and Aldermen of the City of Charleston, whether the same be a regular election or one to supply a vacancy or vacancies in any of the said offices, the Supervisor of Registration for Charleston County shall furnish the managers of such elec-

tion with one of the registration books for each such precinct, or with a copy of such book, duly certified by the said Supervisor to be a true copy; for the care and custody of which the managers receiving the same shall be responsible, and which they shall return to the Supervisor of Registration within three days after the close of the election:—

PROVIDED, HOWEVER, That in case the Supervisor of Registration for Charleston County shall fail, neglect or be unable to furnish the managers of such election with the registration books or with copies of such books, duly certified by the said Supervisor as required hereinbefore, in time for any such election, then, and in such case, the production by any voter qualified to vote at such election and offering to vote thereat, of his registration certificate issued in accordance with law shall be sufficient evidence of his having been duly registered. PROVIDED, said certificate of registration shall have been issued on or before the thirty-first day of May, eighteen hundred and ninety-one, by the Commissioners appointed under the provisions of the Act mentioned in the preamble hereof, or by any Supervisor of Registration for Charleston County since the date last named.

Section 2. That all Acts or parts of Acts inconsistent with the provisions of this Act be, and the same are hereby repealed.

Section 3. That this Act shall take effect from and immediately after its approval.

Approved December 4th, A. D., 1891.

20 Statutes, 1270

APPENDIX.

Address delivered by the Hon. Charles H. Simonton on the unveiling of the Washington Light Infantry Monument, July 21st., 1891, in Washington Square.

Gentlemen of the Washington Light Infantry; Comrades of the Veterans :

On this beautiful summer's afternoon we unveil a permanent memorial of our dead. The Monument erected in Magnolia with so much effort nearly a quarter of a century ago, was among the first of its character in the South. It has proved to be of perishable material. Providentially we are able to substitute for it, this shaft of imperishable granite, the product of our native soil. May it remain through many generations, the faithful witness of our affection for our comrades.

At the dedication of the first Monument, we were honored by the presence of Wade Hampton, and heard from his lips an eloquent exposition of the principles and the motives for which the Confederate Soldier put his life in peril. He discussed the cause which led up to the war and paid the tribute of a soldier and a statesman to its dead heroes. Ours is a more humble, but not less interesting task. A few survivors of a stormy period, we gather for the last time around this commemorative shaft in tender memory of the friends and companions of our boyhood and early manhood. We pay the tribute of affection. Again we feel the sense of personal bereavement. Nearly every name on that monument recalls some one of our personal friends. Many of them had been in the old company before the war, had met with us at drills, parades and company meetings, and had sat with us around the same festal board. We can recall their familiar features, their well known names, the tones of their voices, their personal characteristics. They shared

with us the jest and frolic, the toil, of our holiday excursions. How this occasion brings back to us the memory of our long lost youth, its aspirations and its hopes, its careless enjoyment of the present, its confident encounter with the threatening future. In this halcyon period, these men heard the call of the State, to arms. Reared in a community which recognized the superior authority of the State, without any hesitation they obeyed the call. To them it was a simple question of duty. They gave the best proof of their sense of its obligation, their lives.

I propose on this occasion, appealing as it does so much to our affections and so full of touching associations to confine myself to our family history, to tell in a few brief words the story of our three companies in the war between the States. We arrogate for them no superior place. We lay claim to no unusual merit, to no marked excellence, no special service. That grand army of which they formed a part was an army of unnamed heroes, was filled with able men content to march in the ranks, to encounter without reward or hope of reward, the toils and perils, and suffering of a private soldier; but one motive guiding them, duty to their State, one hope sustaining them, that their cause would succeed. The history of each regiment composing that army was the same. From every rank in life in our Southland they went, filled with enthusiastic patriotism, caring nothing for the questions disturbing politicians and Statesmen, knowing only that their country was invaded, ready to meet any odds. At first they were borne along in the flush of victory; at the end they were in calm despair. At no time, under no circumstances were they faltering or false to the cause for which they had pledged their all.

The Washington Light Infantry, a volunteer militia company, owed its origin to the burst of patriotic indignation which swept the country upon the encounter of the Chesapeake with the Leopard. The Leopard skin so long a part of our uniform, commemorates this. William Lowndes was then at the opening of that brilliant career which would have borne him to the Presidency but for his untimely

death. He organized the company and his character and genius gave it its first impulse. Through many years it enjoyed and profited by the influence of successive, excellent Captains, the bold and energetic Cross, the accomplished Wm. Crafts, S. Lewis Simons, a valued and public spirited citizen, W. H. Miller, the accomplished merchant, the learned and popular Gilchrist, Henry Ravenel, fitting representative of a pure Huguenot ancestry, the calm and incorruptible B. M. Lee, Wm. Jervey, the modern Southern gentleman, the accomplished W. D. Porter, profound lawyer, gifted orator, distinguished statesmen, Joseph Walker, energetic, active and accurate, L. M. Hatch, with his laborious study of and genius for war. Its social position and influence were remarkable. With ranks always full, and with an unquenchable esprit du corps, it maintained during all the years of its existence the well earned and well deserved reputation of a Crack Military Company. Originally formed for service and kept always well equipped, it was used during two National Wars and on many occasions of Civil disturbance. The militia system of the State was in excellent condition, and details were constantly made from Brigade and Division Headquarters. In these details, the Washington Light Infantry frequently appeared. When, therefore, the troublous time of 1860 began, and the State was in the ferment presaging war the logical result of circumstances brought the Washington Light Infantry to the front, and they were among the first called upon for duty. Early in November, 1860, they were sent to guard the Charleston Arsenal. They were then detailed to do patrol duty between Sumter and Moultrie, they were in the detachment which took possession of and manned Castle Pinckney. The Gun upon the Star of the West called them to Morris Island. and as a company of the Regiment of Rifles, they did their part during the whole of the operations around Sumter.

What a holiday campaign that was, with what appliances and comfort did we begin the first days of the war. A rude awakening was before us. How few dreamed when the first

gun was heard opening the siege of Sumter that its sound would re-echo through this broad land, summoning a nation to arms, inaugurating a struggle in which the traditions and habits, the institutions and wealth, the result of a century and a half would be swept away forever. The first realizing sense of the work before us came when we bade God speed to the Washington Light Infantry Volunteers on their start for Virginia. This our first contribution to the Confederate Army, left Charleston for Columbia in May, 1861, and was the first company reporting for duty in the afterward renowned Hampton Legion, and became and is known as Company A, in that veteran command. To no better man could have been entrusted the good name of the Washington Light Infantry than James Conner, who went out as their Captain. With large personal influence, unquestionable courage, great self control, firm, just, considerate, he was an ideal commander. Then he began the career which by force of unusual merit carried him through all inferior grades to the post of Brigadier. In which he won while living, the respect, confidence and affection of the State, and which put a whole community in mourning for his death.

The story of the Washington Light Infantry Company A, of the Legion would be the history of the Army of Northern Virginia. It was among the very first of the organizations which formed that Army. It followed the fortunes of Lee and Jackson, of Johnson and Longstreet from the first Manassas and its remnant surrendered at Appomattox. One hundred and fifty-two officers and men served with it. It gave three Brigadiers to the Confederate Army, In twenty five pitched battles, on very many a weary march footsore, barefoot, starving in the winter camp, staining the snow with bloody footsteps, in the sweltering trenches they exhibited the highest and best qualities of the soldier and acquired for themselves a reputation of which we may well be proud. Our roll of Captains has no name more honored than Conner, Logan or Thomas.

To-day has been selected for our present purpose because

it is the anniversary of the first battle in which blood was shed in the Washington Light Infantry—Henry Blankenser, G. L. Philips, Gabriel Jervey and Henry A. Middleton, Jr. The war found Mr. Middleton a successful planter in Georgetown. He had raised a company of Cavalry for service. Impatient to be at the front, he resigned his position and volunteered as a private in Company A of the Legion. At first Manassas he fell mortally wounded. In his own person he gave one more instance of devotion to South Carolina, which has characterized his family—which has interwoven their name with that of the State from the earliest period of colonial history. There is one name on this monument, a private in Company A, of the Legion, a stranger to many of us, which, even in this hurried sketch, deserves mention. Oscar Lieber, the eldest son of Dr. Francis Lieber, was reared from early boyhood within the walls of the South Carolina College. Associated with several generations of students he imbibed all the tastes and feelings, the principles and prejudices of these friends of his boyhood. Graduating at that College his marked ability and acquirements created frequent demands for his services in this and in the Gulf States, and he became the State Geologist. When the war broke out he volunteered in Company A. His distinguished father, forgetful of his own stormy youth and that he was an exile from the fatherland, because of his political opinion, denounced his son as a traitor and rebel, disowned and repudiated all relationship with him. He suffered his son to die of his wounds, affectionately and tenderly nursed, it is true, but by strangers in blood to him, and shut his ears to any report of his son's last hours. We, the children of the soil, may have made sacrifices. We were supported by the sympathy of those nearest and dearest to us. Lieber, when he followed his convictions, made sacrifice and shipwreck of all the ties which men hold most dear.

One other name cannot be passed over in silence. Theodore Klinck entered a boy into the ranks of the old Company and had the affection of all of us. In the enthusiasm

of his nature he preferred the prospect of immediate active service in Virginia, and no better man followed the lead of Conner. His courage and ability attracted the notice of his Commanders and he gave promise of an honorable career. He fell on the field of battle a young martyr to the lost cause. His venerable father had not recovered from this sacrifice, when he was called again to mourn for his first born son, John Klinck, whose blood also stained the soil of Virginia.

After the departure of the Volunteers for Virginia the Company remained for some months, a part of the Rifle Regiment and did duty on the Sea Islands in front of and below Charleston. In February, 1862, they were ordered into Confederate Service. So full were its ranks and so great was the popularity of the Company, so earnest and universal the enthusiasm prevailing the whole community that two full Companies, one hundred and twenty-five men each, went out as Companies A. and B. Washington Light Infantry. They were a splendid body of men, young, intelligent, well drilled, many of them fit for positions of command. Ordered at once into service in the Eutaw Battalion, afterward 25th Regiment, they were on Coles' Island, Battery Island and on James Island. The duties performed by this Regiment were perhaps the most trying to which a soldier, certainly a volunteer soldier, can be exposed. There was a little of the glow and excitement of constant and actual conflict, the din of arms and the fierce delight of battle. Day and night they were at the outpost, at the entrance of the most direct road to Charleston, the eyes and ears of the Commanding General, watching each movement of a powerful, active and brave adversary. For months at a time they were the only Infantry regiment on this part of the defence of the city, and upon them was the most grave responsibility. The picket lines were in sight of and within easy reach of the enemy. Being on the Stono and the estuaries connected with it, they were exposed to constant attacks from gun boats and to the formidable armament of the ships of war.

They lived in a deadly climate, against whose poisonous atmosphere they could take no precaution. Standing on the defensive, they could only endure and be patient, repressing the eager desire, whetted by news from other quarters, to go into active service where, at the least, they could attack as well as defend. During this weary period there were episodes which relieved the monotony. With their regiment these two companies took part in movements of troops within the military district and in North Carolina. On their return, they were in the engagement preliminary to the battle of Secessionville, and took their full part in that complete victory. Here they met their first losses in battle. Among them Richard Greer, gentle, amiable, affectionate, than whom no better man wore the gray. Fleetwood Lanneau cut down in the glory and bloom of promising manhood, and that Christian soldier, Taverner, the gallant Englishman who fell fighting in defence of the homes of his friends. Then came Wagner. Against this lonely outpost of Sumter the whole power of a magnificently equipped Federal army, and of the navy of iron clads, has exhausted itself. Exposed in front to constant artillery fire and the rifles of sharp shooters, and on the flank to the heaviest naval bombardment then known in civilized war, its defence tested the courage of the bravest. Companies A and B, with the rest of their regiment, did their tour of duty in his famous fortress, and the blood of their dead reddened its sands. Here Lieut. R. A. Blum lost his life. A member of a large and influential German family of Charleston, he exhibited in a high degree the best qualities of the race from which he came. To its traditional courage he added honesty of soul, patience, firmness and unfaltering fidelity. At the last service of the regiment in Wagner, the approaches against the fort had been completed, and the last trench had reached its walls. It had served its full purpose and had become untenable. Any further occupation would have involved unnecessary loss of life. At the dead of night, in a silence interrupted only by an occasional shell or the buzz of a bullet, the companies of the 25th regiment

and the rest of the garrison quietly left the fort and proceeded to the landing. The order had been given that the dead must be left. But Lieut. Berger was determined that Blum should sleep with his fathers. Raising his friend in his arms he took his place with Company B, the right company of the regiment, and the dead Lieutenant led the evacuation. It was accomplished without loss. The last men to leave the Island were J. L. Honor and Lieut. J. A. Ross, of Company A. These companies formed a part of the garrison of Sumter on several occasions, and have earned the right to put its name on this memorial stone. Those of us who are survivors can even now recall the shudder with which we learned that eleven young men of our companies, crushed under its crumbling walls, found a sudden and awful death in Fort Sumter. Well may any troops who served in these two forts, Sumter and Wagner, be proud of the record. So long as American history shall be read the unflinching courage, heroic endurance, desperate resistance against overwhelming odds, fearless disregard of death in almost every form which the garrisons of these forts exhibited during the long months of almost hopeless struggle, will attract the attention and command the admiration of our countrymen, whether they or their ancestors wore the blue or the gray.

The tide of the war at last set for these two companies toward Virginia, and the impatient hopes of them and the other companies in their regiment were gratified. On the first of May, 1864, composing a part of Hagood's most efficient and excellent brigade, they took up the line of march, and upon reaching Petersburg at once went into action.

In rapid succession they were engaged at Swift's Creek, Port Walthall Junction, Drury's Bluff, City Point, Bermuda Hundreds and Gaines's Mills, and took part in and witnessed the terrible repulse and slaughter of Grant's army at Cold Harbor. In these engagements Hagood's Brigade proved the completeness of their preparations for active duty on the battlefield. The 25th Regiment did its full

share in seconding the ability and increasing the reputation of its war loving Brigadier, and in the 25th Regiment Companies A and B did not have an inferior place. They were worthy comrades of Pressley, Glover, Sellers, Gordon, China, Lesesne, and the brave Hammonds, Harper, Mazyck, Bartless, Izlar and the gallant Dibble. And in every engagement they obtained the praise of their commanding officers. At the beginning of their Virginia campaign Bomar and Taft, Lieutenants of Company B, lost their lives. Both young, promising and brave, they were excellent specimens of Southern manhood. Taft had in him the blood of New England, and all the cool daring and sturdy pluck of his race. Bomar represented the best blood of Upper Carolina, as chivalrous as Bayard and as modest as a woman. Both fell cheering on their men, in the flush of victory and with the light of battle on their faces. From Cold Harbor the brigade returned to Petersburg, and were among the troops which met Grant's first advance against that historic city, digging the first trenches in its defence. Thenceforward for some months they remained under General Lee, and shared in the defence of Richmond and Petersburg. The world will never know the complete measure of the heroism of Lee's army. Shut up in the trenches around Petersburg and Richmond, ill fed and scantily clad, opposed by troops thoroughly equipped and provided with every necessity, veterans of an hundred battles, and knowing as well as their commanding General that the siege could have but one end, every mail bringing them tales of distress and suffering at home, to many of them of burning homesteads and houseless families, they kept up a stubborn resistance watchfully and successfully resisting every attack, at times themselves attacking and at all times defying cold, hunger, danger, death and fate itself. In one of these sorties, that on the Weldon Railroad, Hagood's Brigade took a leading part under the eye and following the example of its brave Commander. Its Companies were almost destroyed. There fell James A. Ross, Lieutenant of Com-
